Transfer and lifting aids

SystemRoMedic™

SystemRoMedic™ - simple solutions for great results.

During the 1980s, load injuries increased dramatically within healthcare. At the same time, our company was founded and the very first SystemRoMedic™ transfer aid, the sliding mat EasySlide, was launched. EasySlide represented an entirely new approach and a new way of thinking when facilitating a supine transfer. The positive market response told us we were on the right track.

30 years in the service of simplicity

In 2014, Handicare celebrated its 30th year as a company. For more than a quarter of a century we have been dedicated to developing clever and easy-to-use assistive devices for safe and easy transfers and to making everyday life and work easier for both patients and personnel in healthcare.

And today, with SystemRoMedic™, we offer the market's broadest and most complete range of easy-to-use, effective and safe assistive devices for all types of patient transfers.

The challenge

Every day, healthcare staff find themselves in situations where they are pressed for time, short of personnel and lacking knowledge and access to simple and functional assistive devices.

Inadequate budgets in combination with the ambition and desire to provide a high standard of care contribute to the occurrence of various load injuries. The result is increased staff absenteeism and escalating costs. Putting an end to this negative spiral can be difficult.

The solution is simple, naturally

The transfer-assistive devices in the SystemRoMedic™ range are based on simplicity, logical thinking, ergonomic principles and design with the patient and caregiver in mind.

Simplicity is the key. Attention to the basic principles results in user-friendly solutions. And, in fact, it is the simple, most time-saving devices that actually get used. SystemRoMedic™ works with the laws of nature – not against them. Friction, for example, is a factor that must be considered. With smart solutions and combinations of special, functional materials, we can both reduce the friction under the patient to facilitate transfer or repositioning, and increase the friction to minimize the risk of the patient sliding out of bed.

Activating the patient

The more strength and functional capacity the patient has, the more he is able to participate in his own transfer or repositioning. And the more active the patient is, the easier the transfer will be for the caregiver. The SystemRoMedic™ transfer-assistive devices help the caregiver to activate the patient while stimulating a natural movement pattern. In addition to strengthening the patient's muscles, this also contributes to the patient's sense of independence. In this way, we can improve the quality of life for the patient while at the same time making the caregiver's job easier and safer.

We love easy transfers!

The number of people requiring transfer assistance is steadily increasing. Load injuries and accidents cause huge occupational health and safety problems that account for enormous costs in healthcare.
SystemRoMedic™ offers simple solutions for great results. It's a matter of simplifying life and work and of preventing load injuries and accidents that occur in connection with patient transfers. It also has to do with activating and rehabilitating people, facilitating transfers, even for pain-sensitive patients, and preventing pressure sores.
Plus, it is a matter of improving the patient's sense of independence, dignity and self-esteem. With SystemRoMedic™, healthcare providers can take a step in the right direction. Our products are simple, safe and renowned for their cost-effectiveness. Our training programs in transfer technique and product use give caretakers the means to choose the right working method and assistive device for every transfer situation.

We have seen what our devices can do for people, and this inspires us to continue developing new products. We love easy transfers!
System**RoMedic**™

SystemRoMedic™ is a complete solution that provides for the majority of patient transfer requirements. From the simplest to the most complex scenarios, from the lightest to the heaviest. The concept encompasses assistive devices for four different categories of transfers:

• Transfer, assistive devices for transferring patients between two locations

• Positioning, assistive devices for repositioning of patients within the same location

• Support, assistive devices for mobility support e.g., during sit-to-stand or gait training

• Lifting, assistive devices for manual and mechanical lifting of patients

Through a combination of training and a complete range of effective transfer-assistive devices, SystemRoMedic™ offers improvement both in the work environment and in the quality of care and, at the same time, achieves significant cost savings.

Find the right transfer aid for the right situation.

SystemRoMedic™ offers solutions for all transfer situations and needs. To make it easier to find and choose the right transfer aid for the right situation, please use the below matrix to combine the main products in four transfer categories with the 14 most common activities in patient transfers.

SystemRoMedic™

EasyGlide 5020

EasyGlide 5060

EasyGlide

For sitting transfers from wheelchairs to beds, toilets, car seats and many other seated positions. It is especially suitable for leveling out height differences or for bridging short distances. Available in two models and several sizes.

Art. No.	Product name	Description	Unit
5020	EasyGlide	60 x 33 cm/ 23.6" x 13", three-part	1 Pce
5050	EasyGlide	75 x 33 cm/ 29.5" x 13", three-part	1 Pce
5060	EasyGlide	60 x 25 cm/ 23.6" x 9.8"	1 Pce
5070	EasyGlide	45 x 20 cm/ 17.7" x 7.9"	1 Pce

Accessories			
4014	Storage pocket	For 5020, 5050	1 Pce

ReadyGlide

ReadyGlide is a sliding board that has been designed to simplify transfers in a seated position, for example, between bed and wheelchair or between wheelchair and toilet.

Art. No.	Product name	Description	Unit
15030	ReadyGlide	60 x 25 cm/ 23.6" x 9.8", polyethylene	1 Pce

EasyGlide

For supine transfers from one bed to another.

Art. No.	Product name	Description	Unit
5000	EasyGlide, extra long	120 x 60 cm/ 47.2" x 23.6"	1 Pce
5010	EasyGlide, extra long	170 x 59 cm/ 66.9" x 23.2"	1 Pce
EasyGlide 5000

EasyGlide 5010

EasyGlide

For supine transfers from one bed to another but also for positioning higher up in bed and for placing a lifting sling.

Art. No.	Product name	Description	Unit
5040	EasyGlide, oval	85 x 39 cm/ 33.5" x 15.4"	1 Pce
5042	EasyGlide, oval	85 x 39 cm/ 33.5" x 15.4"	2 Pcs

EasyGlide, oval is also available in a smaller model for positioning further back in chair, see page 9.

EasyGlide 5042

MoveMaster

MoveMaster is a slightly different, open sliding mat with handles at one end. This makes it possible to help by pulling patients in various transfers, such as moving them further up in bed. MoveMaster is particularly well suited for use against bare skin when transferring to shower chairs or to the toilet.

Art. No.	Product name	Description	Unit
2090	MoveMaster	47 x 120 cm/ 18.5" x 47.2", 3 handles	1 Pce

EasySlide

EasySlide (190 x 60) is primarily used for supine transfers, for example between beds and x-ray or operating tables, shower trolleys, stretchers and similar. EasySlide is also a very effective aid for turning patients in bed or on x-ray or operating tables. Disposable covers for EasySlide provide for improved hygiene and less laundry.

EasySlide 1030

Protective Cover

Disposable cover

WallRack

1020	EasySlide	190 x 60 cm/ 74.8" x 23.6"	1 Pce
1030	EasySlide (1020 + 1051)	190 x 60 cm/ 74.8" x 23.6" complete	1 Set
Accessories			
1051	Protective cover	For 1020, 1030	1 Pce
1055	Disposable cover	For 1020, 1030	2 x 50 Pcs
1151	Protective cover	For 1120*, 1130*	1 Pce
1155	Disposable cover	For 1120*, 1130*	2 x 90 Pcs
1085	WallRack	For storing of sliding mats and disposable covers for EasySlide and RollerSlide	1 Pce

* 1120, 1130, EasySlide 100 x 60, discontinued

ReadySlide

ReadySlide is a thin, pliable and very easy-to-use sliding mat that facilitates various types of lying transfers of patients, positioning in chairs and application of lifting slings.

Art. No.	Product name	Description	Unit
11250	ReadySlide	70 x 70 cm/ 27.6" x 27.6", polyamid	1 Pce
11230	ReadySlide	110 x 70 cm/ 43.3" x 27.6", polyamid	1 Pce
11235	ReadySlide	110 x 90 cm/ 43.3" x 35.4", polyamid, extra wide	1 Pce
11210	ReadySlide	195 x 70 cm/ 76.8" x 27.6", polyamid	1 Pce
11215	ReadySlide	195 x 70 cm/ 76.8" x 27.6", polyamid, with handles	1 Pce

RollerSlide 9145

RollerSlide, flexi 9148

RollerSlide

For supine transfers of inert patients between a bed and an x-ray or operating table, shower trolley, ambulance stretcher or similar. Bridges gaps and moves with the patients during the transfer.

RollerSlide consists of a padded sliding board with a cover made from ULF™ (Ultra Low Friction), a sophisticated sliding material that slides round the board during transfer. RollerSlide is available in three models and several sizes.

RollerSlide, flexi is a lighter and bendable variant of RollerSlide.

RollerSlide, light is a light-weight variant of RollerSlide, flexi.

RollerSlide, flexi is also available in two wider variants adapted for larger and heavier patients weighing up to 300 kg / 660 lbs, depending on the distance between the underlying surfaces.

Art. No.	Product name	Description	Unit
9145	RollerSlide	175 x 50 cm/ 68.9" x 19.7", foldable	1 Pce
9155	RollerSlide	85 x 50 cm/ 33.5" x 19.7"	1 Pce
9148	RollerSlide, flexi	175 x 50 cm/ 68.9" x 19.7, foldable	1 Pce
9158	RollerSlide, flexi	85 x 50 cm/ 33.5" x 19.7"	1 Pce
9120	RollerSlide, light	175 x 50 cm/ 68.9" x 19.7", foldable	1 Pce
9110	RollerSlide, light	85 x 50 cm/ 33.5" x 19.7"	1 Pce
9170	RollerSlide, flexi	175 x 60 cm/ 68.9" x 23.6", foldable	1 Pce
9175	RollerSlide, flexi	85 x 60 cm/ 33.5" x 23.6"	1 Pce

WallRack

Patent: AT-1648368, CH-1648368, DE-502004013222.7

OneWaySlide

OneWaySlide has many functions. The main one improves sitting positions in chairs or wheelchairs. The sliding mat effectively retards forward movement yet slides backwards, making it easy for the caregiver to help the patient move into a more comfortable position in the chair. Also available in a tube-shaped design without handles for the more active patient.

OneWaySlide 2075

OneWaySlide 2069

Art. No.	Product name	Description	Unit
2074	OneWaySlide	110 x 30 cm /43.3" x 11.8", 6 handles	1 Pce
2075	OneWaySlide	130 x 40 cm/ 51.2" x 15.7", 6 handles	1 Pce
2076	OneWaySlide	130 x 45 cm/ 51.2" x 17.7", 6 handles	1 Pce
2077	OneWaySlide	130 x 55 cm/ 51.2" x 21.7", 6 handles	1 Pce
2069	OneWaySlide, tubular	50 x 40 cm/ 19.7" x 15.7"	1 Pce
2070	OneWaySlide, tubular	50 x 45 cm/ 19.7" x 17.7"	1 Pce

EasyGlide

EasyGlide are used in pairs to facilitate positioning further back in chair. The smaller size makes it easier to place the sliding boards under the patient's thighs and seat.

Art. No.	Product name	Description	Unit
5045	EasyGlide, oval	45 x 20 cm/ 17.7" x 7.9"	2 Pcs

AutoSlide

Facilitates getting in and out of cars, allowing patients to turn easier and move sideways.
The seat cushions are firmly attached to the backs of car seats, so patients cannot slide forward.

Art. No.	Product name	Description	Unit
8100	AutoSlide	46 x 46 cm/ 18.1" x 18.1"	1 Pce

Sliding aids

EasySlide 1220

Disposable cover

WallRack
EasySlide

EasySlide (100 x 70) is mainly designed for patients requiring only some care who need to turn and move in bed. It performs best on a rough surface. EasySlide reduces the friction on both shoulder and hip, which in turn reduces the risk of pressure sores. Thanks to these features, EasySlide is very gentle for patients in pain but also for the caregiver, thus avoiding the risks associated with lifting.

Art. No.	Product name	Description	Unit
1220	EasySlide	100 x 70 cm/ 39.4" x 27.6"	1 Pce
1230	EasySlide (1220 + 1251)	100 x 70 cm/ 39.4" x 27.6", complete	1 Set

Accessories

Art. No.	Product name	Description	Unit
1251	Protective cover	For 1220, 1230	1 Pce
1255	Disposable cover	For 1220, 1230	2 x 90 Pcs
1085	WallRack	For storing of sliding mats and disposable covers for EasySlide and RollerSlide	1 Pce

EasySlide 1430

EasySlide 1470

WallRack

EasySlide

EasySlide (140 x 90) is designed for normal-weight patients with limited to severely reduced abilities to participate in the turning process. These patients are often permanently confined to the bed, and it is therefore important to prevent pressure sores. EasySlide (200 x 90) has extra padding in order to further reduce the risks of pressure sores. The padding distributes the pressure over the entire body and reduces pressure, friction and the risk of shearing on the especially vulnerable pressure points: the shoulders, hips, head, and feet.

| Art. No.	Product name	Description	Unit
1420	EasySlide	140 x 90 cm/ 55.1" x 35.4", 2 fastening straps	1 Pce
1430	EasySlide (1420 + 1451)	140 x 90 cm/ 55.1" x 35.4", complete	1 Set
1470	EasySlide	200 x 90 cm/ 78.7" x 35.4", 4 fastening straps	1 Pce
1480	EasySlide (1470 + 1481)	200 x 90 cm/ 78.7" x 35.4", complete	1 Set

EasySlide 2010
EasySlide 2015

Disposable cover

WallRack

EasySlide

EasySlide (50 x 60), (50 x 70) and (25 x 60) are excellent aids for turning in bed, for moving patients higher up in bed or for transferring them from the bed to the wheelchair. EasySlide is a small, practical aid that encourages activation. For the caregiver, EasySlide decreases the number of assisted positionings and eliminates unnecessary lifting, which spares both back and shoulders.

Art. No.	Product name	Description	Unit
2010	EasySlide	50 x 60 cm/ 19.7" x 23.6", polyester	1 Pce
2020	EasySlide	50 x 60 cm/ 19.7" x 23.6", microfiber	1 Pce

EasySlide, disposable

EasySlide, disposable is a thin, pliable and very easy-to-use personal sliding mat for short-term use. EasySlide, disposable can be used to facilitate turning and repositioning higher up in bed, for supine and seated transfers, and for repositioning in the seated position. EasySlide, disposable can also be used to lift the patient's legs in and out of bed, to assist dressing and undressing, and to facilitate application of a lifting sling. EasySlide, disposable is a new, unbelievably versatile sliding mat that makes many common transfers, even heavy ones, easier for both the patient and the caregiver. The sliding mat is made of environmentally friendly polyethylene (PE) plastic and the practical, hygienic package contains a roll with up to 60 individual EasySlide mats for short-term use. EasySlide, disposable is also available in a practical and hygienic single-pack which is very convenient to always have close at hand.

Art. No.	Product name	Description	Unit
2040	EasySlide, disposable	50 cm x 70 cm/ 19.7" x 27.6"	2 x 60 Pcs
2045	EasySlide, disposable	50 cm x 70 cm/ 19.7" x 27.6" including practical wall and tabletop dispenser in steel	2 x 60 Pcs

ReTurnBelt

ReTurnBelt, wipeable

ReTurnBelt, disposable

ReTurnBelt

Our patented* ReTurnBelt is an excellent complement to ReTurn when there is a need for greater support and stability; for example, when the patient's weight-bearing ability is questionable or varies. ReTurnBelt can also be used separately, for support during sit-to-stand and to stabilize the patient in an upright position, for example, during standing training, gait training and transfer. ReTurnBelt has an anti-slip inside of PU-coated nylon and can therefore be used in environments where moisture and dampness are present or when there are special demands on hygiene. The fabric also ensures that the belt stays in place. ReTurnBelt is also available in a wipeable material, which can be cleaned using disinfectants, and in disposable material which is disposed after use instead of being cleaned. This prevents the spread of multi-resistant and other types of contagious bacteria.

Art. No.	Product name	Size	Measurements	Handles	Unit

SupportStraps

SupportStraps is a multi-functional accessory providing extra support and security for patients during standing, gait training and transfers with Handicare's SystemRoMedic™ belts, sit-to-stand aids and transfer platforms.
SupportStraps can be used as:
- leg harness for EasyBelt/FlexiBelt,
- torso/side support when using QuickMove together with EasyBelt/FlexiBelt/FlexiMove
- side support when using ReTurn together with ReTurnBelt

FlexiBelt

FlexiBelt, hug

EasyBelt

EasyBelt, hug

EasyBelt, wipeable

FlexiBelt / EasyBelt

FlexiBelt and EasyBelt are used for sit-to-stand transfers or for moving from the wheelchair to the bed, toilet or car. FlexiBelt has a soft innerside of polyester velvet which makes it very comfortable to wear. EasyBelt has an anti-slip inside of PU-coated nylon and can therefore be used in environments where moisture and dampness are present or when there are special hygiene requirements. EasyBelt is also available in a wipeable material which can be cleaned using disinfectants.

FlexiBelt, hug and EasyBelt, hug are new versions of Handicare's classic SystemRoMedic™ belts. FlexiBelt, hug and EasyBelt, hug feature a new patented* design with horizontal handles that slide freely in loops to make the belt "hug" on to the patient instead of sliding up during transfer situations. With FlexiBelt, hug and EasyBelt, hug the caregiver can provide even more support without using more effort. The new design actually does all the work by itself.
