

## Universal Lift Belt

The Universal Lift Belt fits all sizes and shapes of people eliminating the need to change clothing. A full set of leg wraps, S,M,L are included with each Belt assuring an ideal fit. The Belt and wraps can be disinfected or machine washed as needed.

## Super Lift Belt

The Super Lift Belt has all the features of the Universal Lift Belt but with additional tension in the cords. The additional tension provides 40–50% more lift and stability. If your clients have balance problems or might require more lift due to the severity of their condition then the Super Belt is an ideal option.

## Elastic Wraps (pair)

The Elastic Support Wraps create solid connection of the down straps to the thigh to hold proper position during use. The wraps can be removed from the down straps for custom positioning or cleaning. The wraps will need replacement when the elastic becomes overly stretched.

## Lift Straps (Pair)

The Lift Straps are constructed with medical grade hook velcro and are designed to bond securely with the loop section of the Magic Shorts. The straps can be disinfected with Spray or machine washed.

## Magic Shorts (pair)

The Magic Shorts are designed and tested to withstand the toughest workouts. Breathable, moisture-wicking material provides comfort and mobility. Durable side panels of loop velcro bond with the hook of the Lift Straps and will keep the Lift centered during your workouts.

Available in 6 sizes. Machine wash & dry

## OVERHEAD SAFETY HARNESS

Supplied with the LSX-500. The Overhead Safety Harness provides fall protection when working with clients who pose a risk of falling due to medical condition, speed or activity. The Overhead Safety Harness is not designed to provide lift but will prevent falling onto the treadmill or ground.
