

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Asheville play system is a compact activity center which will fill your play area with bright colors and the sound of music. There is a semi-enclosed area of four panels covered by a Leaf Roof, which acts as a nice sheltered area for kids to hang out as they play. The Gear Panel under this roof can be enjoyed from inside or outside of the shelter. This area has an easily accessible entrance between the Store Panel and Gear Panel, but also has an additional secret entrance and exit through the Curved Crawl Tube. The curved shape of the tube means that children will discover mysteries as they emerge from the other side of the tube. The Drum Panel and Bongos let children work together to create new and unique rhythms that will be enjoyed by kids all over the playground.

Product Specifications

- Model Number:** PKP111
- Age Range:** 6-23 months
- Child Capacity:** 11-13
- Fall Height:** 12"
- Post Diameter:** 3.5-inch
- Product Type:** Spark
- Safety Zone:** 16' 9" x 17' 3"
