ASR2011

CREATING A CYCLE OF mobility

Inseam Range: 23" - 34"

Pre-teen and adult riders can experience the joy of riding with this semi-recumbent tricycle. The ASR2011 features a low step-through height of 15" which allows for easier transfers, as well as a low seat base for added stability. Thanks to its adjustability, this bike for life will provide riders with the fun and therapeutic benefits of riding a bike for many years to come.

Tips For Choosing an Adaptive Bike

1. Measure Inseam

The measurement we use to ensure each rider gets the correct size of adaptive bicycle is called an inseam. To find an inseam, measure the distance between the bottom of the rider's heel to the top of the rider's inner thigh. Make sure the rider's inseam measurement matches the inseam range for the adaptive bicycle.

2. Know Your Accessories

We offer many different accessories to help people of all abilities experience freedom. Make sure to look through all of our available accessories to make sure the adaptive bike will work for the rider. More information on all of our accessories is available at: www.freedomconcepts.com/product-lines/adaptive-bikes/accessories/

3. We Do Custom

If none of our current models of adaptive bicycles work for you, we are able to custom build a bicycle that will. Please contact us at 1-800-661-9915 for more information.

Seating System

Please Fill Out Either The Child Set Up or The Adult Set Up

Please note that all seat bases come with a seat belt and all high-back back rests come with a chest strap

Child Seat	12.5" width, 12.5" depth
Child High-Back	13" width, 18" height
Adult Seat	16.75" width, 14" depth
Adult High-Back	17" width, 18" height

The 2" raised pommel keeps riders further back in their seats while helping with stability and promotes leg abduction.

A narrow seat aids in clearance and in pass-through. The nose of the seat is slightly narrower to aid with pedaling.

The standard seat will fit and function for most riders.
