

Avante InView HD

Video Laryngoscope

High-performance visualization capabilities for every intubation

The Avante InView HD Video Laryngoscope is portable and ergonomically designed, allowing clinicians to achieve high-quality visualization over many care environments. Available with disposable and reusable laryngoscope blades.

FEATURES

- Video laryngoscope ideal for a wide range of applications: ICU, Cardiology, Emergency and Ambulance.
- Lightweight and ergonomic design weighs less than one pound.
- 3.5-inch display provides high-performance visualization capabilities for every intubation.
- Anti-fog, 2.0 megapixel lens lets clinicians use the laryngoscope immediately without preheating.
- Available with disposable and reusable blades — ask your Avante representative for details.
- Internal 8G SD memory card records intubations for training, etc.
- Video display rotates 180 degrees, as well as up and down.
- Battery life lasts approximately 200 minutes.
- Onboard Micro USB for charging the unit and transferring video files.

Designed to provide an excellent view of the glottic opening and improve the success of tracheal intubation.

SPECIFICATIONS

Weight: ≤ 350 g

LCD Display Size:
3.5" (4:3 Ratio)

Output:
Data Output: Easy to establish and store files

Resolution Ratio:
2.0M Pixels

Field Angle: 66°

Illuminance:
≥ 800 lux

Battery Type:
Rechargeable Lithium Battery

Long Working Time:
≥ 200 min

Voltage: 3.7 V

Capacity:
3200 mAh

Charging Time:
Less than 8 hr

Charging Port:
Micro USB

Input:
100 - 250 V, 50 Hz

Output:
5V, 1000 mA
