scale

model 650-10-1

digital neonatal scale

RICE LAKE'S RL-650 NEONATAL SCALE uses Motiontrap™ motion sensing technology to precisely weigh active babies. By compensating for involuntary movements, the scale is able to weigh newborns and infants up to 33 pounds. A two-sided removable tray keeps babies safe while being weighed and a built-in measuring tape ensures quick and easy measurements. Weight can be displayed in pounds/ounces or kilograms/grams. An optional portable cart and AC adapter provide portability in any hospital or clinic setting.

Capacity	0-10lb (0-5kg)	10-33lb (5-15kg)
Graduations	0.05oz (1g)	0.1 oz (2g)
