# Midline Joystick Mounting Kits

INSTALLATION AND USER'S INSTRUCTIONS

ART NOS. PC202, PC205, PC206 & PC207

These instructions provide important information for the safe use and maintenance of all Bodypoint Midline Joystick Mounting Kits. Give these instructions to the user or their caregiver and review them to ensure that they are understood.

⚠ **CAUTION!** Turn off wheelchairs electrical system before installation.

⚠ **WARNING!** If a serious incident occurs related to the use of this product, it should be reported to the manufacturer (Bodypoint, Inc.) and the local Competent Authority.

MAINTENANCE: To ensure smooth rotation, the PC024 Rotating Shaft should be checked annually for lubrication by sliding back the rubber protective boot (sleeve), as shown in these instructions. Apply a small quantity of medium-viscosity PTFE (Teflon) bearing grease to the slot, and slide the rubber protective boot back into place. No maintenance is necessary on other components.

PERIODIC SAFETY AND PERFORMANCE CHECKS: To ensure user safety, this product must be checked periodically for function and signs of wear. If the product does not function correctly or if significant wear is found, stop using it and contact your supplier for qualified repair or replacement by Bodypoint. Under no circumstance should this product be altered or repaired by unqualified persons — health and safety depend on it!

SCRAP/DISPOSAL: Product is made of materials which can be disposed of safely without special precautions at the end of its useful life.

WARRANTY: This product carries a limited lifetime warranty against defects in workmanship and materials arising under normal use by the original consumer. Contact your supplier or Bodypoint for warranty claims.
