REMOTE SELECTION

LiNX electronic platform offers a range of remotes

These three remotes have the same familiar design and share the same key features:

- Large on/off button allowing easy targeting
- Ergonomic joystick requiring low force to operate
- Accurate system status and battery gauge display
- Easy to use physical speed dial
- Simple keyless lock function

REM110

– Drive Only Remote

The LiNX range of controls starts with a simple set-up that features the drive function, horn and a speed dial.

REM211

– Drive and Power Positioning Remote

The REM211 has additional seating functions which are displayed with easy to understand icons.

Accessories

- Cane/crutch holdert
- Walker holdert
- O₂ holdert

Elevate only power seating

- 12" elevate
- 10" elevate for HD version

Front rigging options

- Adjustable or Fixed Center mount (Adjustable Shown)
- Swing away

† Crutch, walker and oxygen tank sold separately

LINX[®]

REM216

– Drive, Power Positioning and Lights Remote

The REM216 has added light buttons to operate hazard lights, lights and indicators.

- The lights are bright for the active function, and will be dim for inactive functions
- The primary and secondary functions on the light buttons are for lights and hazards.

Invacare LiNX Technology is our insight-inspired control system with advanced technology that is designed to provide a superb driving experience for users and allows professionals to configure and tailor powerchairs quickly and more intuitively.

Key features include:

- Touch screen remote
- Remote selection
- Simple wireless programming
- Enhanced drive experience
- Range of power modules

Rehab Remote with Touch Screen - REM400

**NEW
Touch Screen**

Invacare LiNX control system introduces next generation technology to powerchairs with the REM400 joystick with touch screen that requires minimal force to operate. This innovative joystick allows it to be configured to a user's physical and cognitive ability, making it suitable for a range of users.

- Swipe or tap-only operation including user settings to define the size of the tap area
- Direct access or step by step menu operation
- Glove mode setting for use outdoors in colder weather, or with orthotics
- Screen lock out ability
- Mix and match function in a single profile
- Profiles and functions accessible via the touch screen, built in and added switches, or joystick
- Mouse mover with touch screen mouse clicks

The development of the REM400 has involved extensive research, trials and tests; the joystick knob has been specifically designed to make it easier to access the screen; the on/off switch is positioned out of the way to prevent accidental turn off; the joystick orientation can be adapted to suit a range of motions and there are two programmable multifunctional direct access buttons plus two pre-configured stereo jack inputs.

CORE TECHNOLOGIES

Center Wheeldrive (CWD)

- Designed to provide the smallest turning diameter and smallest overall footprint vs FWD and RWD for optimum maneuverability
- Designed to provide excellent indoor driving experience due to the exceptional maneuverability

SureStep® Suspension and Stability Lock

- Work in synergy to maintain balance and provide stability when transitioning over obstacles
- When maneuvering over everyday obstacles or curbs, SureStep Suspension helps to ensure the seat remains close to level and the power wheelchair maintains virtually constant six wheel contact on the ground
- Stability Lock uses one-way, gas locking cylinders that engage if the rear casters begin to lift off the ground, preventing the chair from lurching forward

G-Trac™ Technology

- Designed to help provide precise tracking for imprecise environments such as side slopes, uneven or soft ground, or even bunched up carpets or door jambs
- Designed to reduce the need for corrective steering actions so the driver uses less effort to reach their destination
- Less corrective steering can assist in reduced fatigue, safer driving, increased driving efficiency, enhanced independence, as well as increased energy to perform other daily living activities

A REFINED CLASSIC YOU CAN CUSTOMIZE FOR YOUR PERSONAL STYLE

- All black frame with complementary black tires and wheels for a modern, elegant design
- Customized, contemporary colored shrouds with reflectors and wheel accent colors
- New rear swing arm design for better controller access
- Standard transport brackets for secure, unoccupied wheelchair transportation
