

CARING FOR YOUR SPIO™

SPIO™ systems are machine washable in warm or cold water with like materials. Hang overnight to dry. The vest comes with a neoprene back piece that should be attached to the fabric with the hook and loop when laundering or when the system is not in use. This will extend the life of the system and lessen the chances of the material snagging. It is not recommend that you launder any of the systems with the hook and loop with towels. It will get caught in the hook and loop and will lessen the attachment ability.
