

BestCare Ceiling Mounted Lift System Customization Guide

In order to best fit the ceiling mounted lift system to your room, it is necessary to measure two adjacent walls of the room where you want to install the system.

Based on these measurements you will be able to select the best fitting rails for your room. Maximum coverage available is 23 ft by 23 ft and all setups must be rectangular/square. Minimum coverage is 14.1 ft by 8.2 ft.

Lift setup is comprised of two types of rails. One type of rail is the two rails that are mounted to the ceiling on opposite sides; the other type of rail is a traverse beam that goes across the room and connects to both ceiling rails.

All Rail Track Length Options:

Track	Length
75mm 2.5m	8.2 ft
75mm 3.2m	10.5 ft
75mm 4m	13.12 ft
75mm 5m	16.40 ft
75mm 7m	23 ft

All Traverse Track Length Options:

Track	Length
135mm 4.3m	14.1 ft
135mm 5.5m	18 ft
135mm 7m	23 ft
135mm Reinforced 4.3m	14.1 ft
135mm Reinforced 5.5m	18 ft
135mm Reinforced 7m	23 ft

Based on these measurements select the best fitting tracks and traverse. As long as the setup remains the same with one of the standard setups and the only thing that is being change is track length, you should select all of the parts of the setup besides the tracks and traverse, and select the new tracks and traverse that you measured for in the **Additional Options** section in **Buying Options**. It is more cost effective to have the traverse run along the longer length of the room, and the two rails run along the shorter ceiling length.

Example Setup:

When configuring a room with the lengths of 18 feet by 17 feet you would select the 18 ft 135 mm traverse track for the 18-foot length, and for the shorter 17-foot wall length you would select the 16.4 ft Etrack. With this in mind you would then select the Buying Option that you are interested in and select all the accessories besides the tracks. So, for example if you were looking for a bedroom setup you would select the Bedroom Ceiling Mounted Lift System and select all of these accessories.

- ✓ Bestcare Luna 275kg / Bayonet [SKU#: BC-TL8-03028]
- ✓ Pendant/1320mm/ bottom exit [SKU#: BC-TL8-03101]
- ✓ Charger/holder / Luna handset [SKU#: BC-TL3-00702]
- ✓ BestLift Luna Sbar/strap/275kg [SKU#: BC-TL8-01968]
- ✓ End Stop 75mm Track [SKU#: BC-TL6-01132(4)]
