

Re-Order Number	Descriptions	Size	Units
914720	Number-Color Association Pad	8.5" x 14"	Each
914723	Laminated Sheets	8.5" x 14"	12 sheets

Purpose

In the early learning stage of a child's development it is important to understand numbers in their relative sense. The Counting/Sequencing Pad consists of six work columns and two storage columns located on the left and right. The pad contains 30 marbles with 5 each of six different colors that can be moved to the separate divisions. With this pad, the client can develop an understanding of numbers in both magnitude and relative size, sequencing and color recognition by selecting the colored marbles and placing them in specific locations. The product is provided with a laminated insert that allows the educator to mark up to develop many creative exercises. The open pocket behind the gel provides the opportunity to be creative and to develop several work sheets.

Easy to Use

Place the Counting/Sequencing Pad on the desk and select an exercise based on the client's level of number development. As an example, ask the person to represent a particular number by accumulating the marbles in the six columns, e.g. column 1, 1 each, column 3, 2 each, column 6, 5 each for a total of 8. The number of variations using numbers and colors is unlimited.

Easy Care

The vinyl pouch is heat-sealed and can be cleaned with a mild disinfectant. Although the gel is non-toxic, if a tear or rip is observed, the unit should be discarded.

Caution

Although the gel is non-toxic, medical care should be consulted if the gel is ingested. It is also strongly recommended that this item not be used for persons cognitively under three (3) years old since the marbles may constitute a swallowing/choking hazard.
