

# Signaling for Fall Management

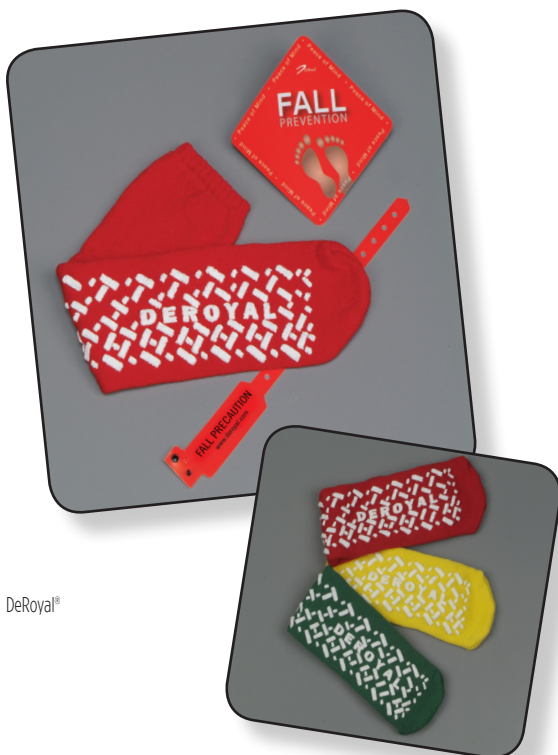

# Helping You Identify Fall Risk Patients

DeRoyal's double-sided slippers and fall prevention kits assist your staff in identifying fall risk patients quickly and easily helping to prevent fall injuries in your facility.

## KIT INCLUDES:

- **Double-Sided Slippers** help prevent falls during transfer or ambulation. Double-sided tread provides extra security and more traction if the slippers get twisted.
- **Fall Prevention Wristband** is clearly marked "Fall Prevention". This allows caregivers to easily identify fall risk patients per the facility's policy while not confusing it with other hospital wristbands.
- **Fall Prevention Magnet** is designed for placement on the outer doorframe of the patient's room to help identify fall risk patients per the facility's policy. Double-sided hook and loop tab is included for placement on non-metal door frames.

Color	Size	Slippers	Kit
