2-IN-1 BOOSTER SEAT Feeding Chair

The **Height Chair** is an adjustable, freestanding chair that can be used at most kitchen and dining room tables. It has a slotted adjustable height, depth, and angle seat, a slotted adjustable angle back, and a slotted adjustable height, depth, and angle footrest. It comes complete with an adjustable 1" pelvic positioning belt.

The **2-in-1 Booster Seat** features a slotted seat, slotted adjustable depth and angle back, and a slotted adjustable height footrest. The highlight of this chair is a rear support that folds up so that the seat, when strapped to a standard chair, serves as a booster seat. With this support down, the seat becomes a 12" high freestanding floor chair. It comes complete with an adjustable 1" pelvic positioning belt.

Romero's chair goes from a feeding chair to a play chair in one easy step.

OPTIONS

A. The **2-in-1 Booster Seat** shown with the Abduction Block, Adjustable Armrests, Butterfly Kit, Foot Sandals, Headrest, Seat and Back Pad Set, Support Blocks (4), and Head Support Wedges. See pages 20-21.
