Equipment Covers & Drapes

 DeRoyal®

Equipment Drapes

DeRoyal's equipment drapes and covers are designed to promote ease of use and provide excellent quality at a managed care price. Our equipment drapes ensure sterility and protect equipment during procedures, and are available in a wide variety of shapes, sizes, and styles. In addition, all of DeRoyal's equipment covers have a special slip coating for ease of application. As such, DeRoyal is your place for "one-stop-shopping" for all your equipment cover needs, offering the best fit, the best quality, and the best pricing.

When it comes to your equipment drape needs... DeRoyal has it covered.

CAMERA DRAPES

Step 1: Insert sterile endoscope into open end of drape with drape lens centered over the end of scope.

Step 2: Securely attach camera to endoscope.

Step 3: Unfold telescoping folds of drape by grasping end and pulling drape over camera and cord.

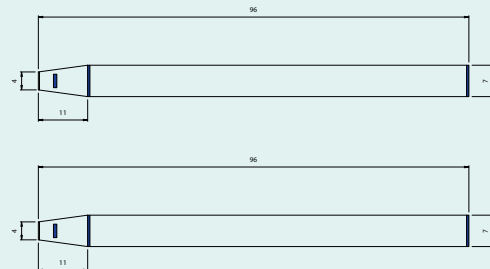

Step 4: Camera and scope are ready for use.

Closed Camera System Drape

- Protects sensitive video cameras from contamination and fluids
- Prevents contamination of sterile field by non-sterile camera when changing scopes during a procedure
- Reduces turn-around time between cases
- Saves costly repairs caused by the repeated soaking and sterilization of camera
- Optically clear lens is anti-fog coated for clarity
- Soft, pliable material around camera provides excellent tactile properties, secure fit and easy operation of scope release buttons
- Latex free

Equipment Drapes

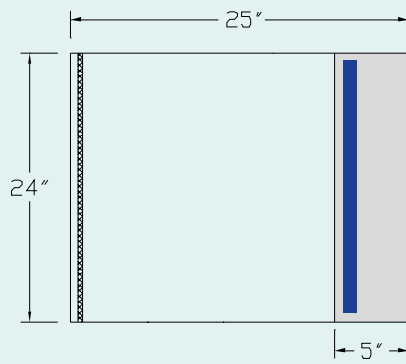

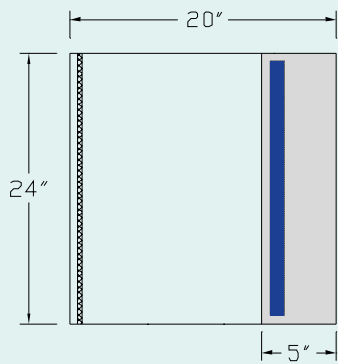

CASSETTE DRAPES

X-Ray Cassette Covers and Liners

- Clear poly bag with wide adhesive strip for closure
- Several sizes to fit a broad range of cassette widths and lengths
- Double Cassette Drape available with unique closure to ensure sterility
- Pull-away liner reduces chance of contamination once cassette is inserted
- Latex free

Product #	Description	Quantity
30-0105	X-Ray Cassette Cover w/Adhesive Strip, 24" x 20", Standard	48/Cs
30-0101	X-Ray Cassette Cover w/Adhesive Strip, 24" x 25", Standard	20/Cs

30-0102	X-Ray Cassette Cover w/X-large Cuff, 21" x 40"	20/Cs
---------	--	-------

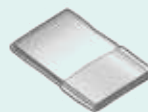

Step 1: Grasp both corners of drape to unfold. Position hands inside cuff at each corner in accepting position.

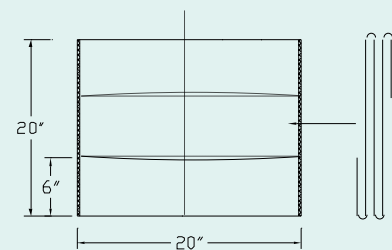

Step 2: Spread drape apart to allow accepted cassette to gently slide to bottom of drape.

Step 3: Fully extend drape.

Step 4: Fold drape until cuff fits opposite end of cassette.

AUXILLARY DRAPES

Isolation Drape

- Protects intestines against trauma and contamination when outside the abdominal cavity during surgery
- Useful to isolate distal portions of extremities from contamination
- Other uses include the transport of specimens and to protect equipment during procedures and storage
- High quality, soft, flexible material that is strong and puncture-resistant
- Impervious vinyl film bag allows the visualization of organs at all times
- High tensile strength and elongation properties ensures the safety of the sterile environment without tearing
- Draw string to enclose to be kept moist throughout the duration of the case
- Moisture-proof surface prevents fluid loss through evaporation
- Latex free

Product #	Description	Quantity
30-5510	Isolation Bag, Clear, 20" x 20"	40/Cs

Foot - Switch Cover

- Non-sterile poly drawstring bag with two layers to protect O.R. foot controls from fluids
- Provides clarity for surgeon when operating foot controls
- Latex free

Product #	Description	Quantity
30-0301NS	Foot Switch Cover, 16" x 18" x 3"	200/Cs

Equipment Drapes

AUXILLARY DRAPES

Slush Drape

- Maintains sterile field
- Facilitates proper slush production and consistency
- Excellent and economical for cardiac and transplant procedures
- Latex free

Product #	Description	Quantity
30-0602	Slush Drape, 54" x 54" (for use under sterile basin)	50/Cs

Case Cart Cover

- Non-sterile, 2 mil cover for critical items on case carts
- Clear poly perforated bag fits to size to keep items in place
- Latex free

Product #	Description	Quantity
