

EVAC+SLED

THE EVAC+SLED ENABLES CARERS TO RAPIDLY AND SAFELY EVACUATE PEOPLE WITH MOBILITY PROBLEMS IN AN EMERGENCY.

The **Evac+Sled** is an evacuation board designed to help evacuate non-ambulant people or people who may not be able to walk down stairs in an emergency. It can be used for children to adults 6 foot 6 inches (198cm.) tall.

The **Evac+Sled** can be used in office buildings, theatres, libraries, hospitals, schools and many other facilities.

Features

1 Long pulling straps

Located at both head and feet to allow for multiple users

2 Angled side board flaps

Insures the body is kept in place and offering protection when transported around doorways etc.

3 Secured patient safety straps

For increased passenger safety andn comfort

4 Adjustable pillow

For added head protection and allowing to fit persons of varying heights

5 Glide-able plastic board

Corrugated plastic board allows for excellent heat insulation preventing injury, plus removing the necessity to unroll every few months to prevent the plastic keeping its shape
