

Evacusafe 3-Wheel Transport Chair

Safe, easy-to-use emergency transport when minutes matter

Evacusafe has designed a transit chair for business and home use. The 3 Wheel Transport Chair has been designed specifically for family members with limited mobility because of disabilities, illness or other medical conditions, who may not be able to get themselves out of a building or house in an emergency. This transit chair is suitable for occasional use in a variety of settings from family parties and social gatherings to business conferences and events.

With its easy-to-deploy design, this transit chair helps you move mobility-impaired people up and down stairs to get to a place of safety in emergency situations like fire. Its unique three-wheel design glides quickly and easily on stairs*, making it patient and user-friendly.

Lightweight and extremely strong, the Evacusafe 3-Wheel Transit Chair is compliant with current safety regulations and accommodates on-board weight of up to 200 pounds. It operates with the aid of two helpers/attendants. When not in use, the chair folds flat and stores in a small space.

*Always perform a full risk assessment prior to stairway use.

Evacusafe 3 Wheel Transport Chair Benefits

- Simple two-person operation
- Sturdy, lightweight construction
- Easy to use on level surfaces
- Secure seatbelt, arm rests and comfortable seat with back support
- Solid carrying/lifting points
- Three-wheeled ascent/descent mechanism
