

FIND-4 TREATMENT TABLES

HERE'S HOW IT WORKS

A few minutes can seem like hours to a child waiting for the doctor or nurse to come into the exam room. Entertain the young patient with a Clinton "Find-4" Treatment Table while he or she waits. It's designed to be easy for staff, yet engaging for children. Ask the child to find one of the fun objects or animals hidden in the picture. There are:

4 BROWN EGGS, 4 CATS, 4 BIRDS and **4 MICE** in each scene.

Keep the number of the objects a secret. Just ask the child how many he or she found. Whether it is all or a few, every child's count is correct to you. Next visit ask them to find one of the other 3 remaining objects.

Keep young patients amused for many visits to come with Clinton "Find-4" original table scenes. Examine real innovation with Clinton.
