

Grow Your Practice

with our **Traction
on the Move 3D**
Devices

»» **What is Traction on the Move?**

Non-invasive solution for back and neck pain through the innovative "traction on the move" protocol. Meditrac devices target the source of the pain, increase the range of motion, and assists with tissue recovery, all while **encouraging your patient's full freedom of movement.**

85% clinically-proven **success rates!**

Your professional touch makes the difference for your patient's success. Your manual-tuning, based on your patient's clinical diagnosis, **is essential** for 100% precise treatment, giving back your patient's smile.

Small devices , Big Relief! We know your clinic's space matters!

Drug-free treatment, no hospitalization or surgery needed.

Since 1992, Meditrac devices have been the active choice for the world's spine clinicians.

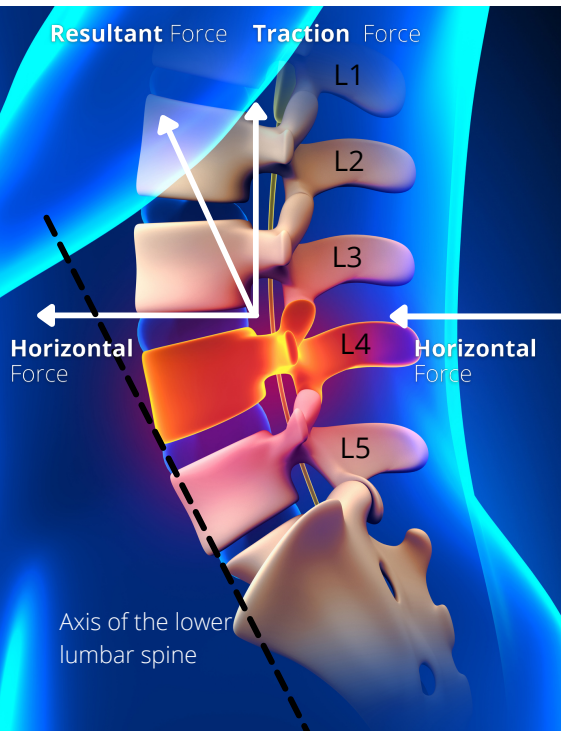

6 Clinical Facts

with our **Traction on the Move 3D** Devices to grow you practice

Redirection of Forces

schematic diagram

» 6 Clinical Facts

- 1 Traction decreases intra-discal pressure on the nerve root and dural sac.
- 2 Disc disorders are accompanied by muscle spasm and reduced transfer of the disc fluid.
- 3 Research shows that fluid transfer is essential to normal biomechanics in the disc and is possible when the Spine is in Motion.
- 4 Vertical traction force increases the intervertebral space, simultaneously with Horizontal force creates an effective 3D forces.
- 5 Muscular contraction during exercise naturally helps to facilitate the fluid transfer & improves range of motion.
- 6 Traction is traditionally administered to patients in the supine position, disregarding the importance of mobility for tissue healing and fluid reabsorption.

Smile!

» Accelerating Your Business Growth

Short-Term ROI

After 4-8 weeks

Short cycle of treatments

Only 10-15 treatments needed to gain back your acute patient's wellbeing. Your patient is driven to feel relief & get Back-ON-Trac

Hybrid Business Models = Faster Growth

Enabling remote follow-up treatments along with standard in-clinic treatment is a smart way to expand new/1st time patients into your practice and offer up-to-date service for existing patient's remotely (based on multiple devices).

Retention treatments are a way of life

A good solid base for returning-clients growth and preventing any downtime of the traction devices.

Traction on the Move

Serves as the anchor for additional services that the clinic produces from each incoming customer (a regular base for upsale).

Let It Be Your Success

With Meditrac's traction treatment, it's easy to get any patient smiling back and spreading around their relief – providing your practice with healthy, organic growth.
