

Suction & Anti-Fatigue Mat

H2NO™ manages and helps dispose of waste fluid during a variety of medical procedures, and offers anti-fatigue properties with unique fluid channels that keep the clinician comfortable and safe.

H2NO is a safe and highly effective offering that provides constant suction of fluids, therefore removing all surgical fluid that comes into contact with the mat. It reduces the amount of laundry of the floor, lends to less weight to pick-up post procedure, and provides safety to any clinician by eliminating the possibility of ponding on the surgical floor. The suction mat is able to collect and evacuate fluid during high fluid procedures, and connects to any suction canister or portable suction unit with standard suction tubing.

H2NO also incorporates a blue, super absorbent mat that captures any fluid that may not come into direct contact with the H2NO. Simple, safe, and affordable, the H2NO is perfect for ridding your surgery floor of waste fluid. The H2NO is ideal for the following specialties: Urologic, Cystoscopy, L&D, Transplant, Orthopedic Sports...all high fluid procedures!

FEATURES & BENEFITS

- Light weight for ease of set-up and disposal - less stress and improved room turnover times
- Economical and necessary for heavy fluid procedures - eliminates laundry on the floor
- Strong, yet quiet, suction with anti-fatigue properties - safe and comfortable
- Non-skid design with fluid channels to keep your feet out of standing fluid - safety
- Single patient use - eliminating cross contamination possibilities
- Latex free

Product No.	Description	Size	Qty
H2NO	Suction & Anti-Fatigue Mat	56" x 40"	10/Cs

Blue Absorbent Mats

The DeRoyal FluidMate™ series of products are specific to waste fluid management, and the new Blue Absorbent Mats are essential in keeping your operating room safe and dry. DeRoyal offers three sizes of Blue Absorbent Mats that will absorb bodily fluids, saline, blood, and other fluids accommodating any surgery suite and any amount of fluid.

SIMPLE. SAFE. ECONOMIC.

The absorbent layers allow for high level protection from Betadine® stains, easy removal of excess fluid during intense fluid procedures and allowing for faster O.R. turnaround.

The Blue Absorbent Mats are an economical way to keep floors dry and therefore decreasing the chance of slips and falls.

FEATURES & BENEFITS

- Three sizes to accommodate any size operating room, lab station, decontamination room, or scrub sink
- Lightweight and pliable with the ability to fold - meaning ease of lifting and placement on the stocking room shelf
- Accommodates rolling casters on carts and accessories - will not tear or bunch
- Laminated impermeable backing eliminates fluid contact to floor and staining
- Cost reduction in the number of soiled linens laundered
- Latex free
