

- Dimensions: Approximately 8'4" x 8'4" footprint [100 in./254 cm] with 10' traverse [304 cm] rail.
- Max height: 7' 11"
- Safe Working Load: 200 kg (440 lb).
- Adjustable feet for easy, on-site leveling. See image on the right.
- Free standing: Unlike larger 4-post systems from Savaria, this newly-created SKU requires no external support, making it a fully free-standing system.
- Rail type: Uses standard Savaria (SD) track, including traverse rail.
- Trolley options: For use with portable lifters, note that the trolley is not included but instead should be ordered separately based on preferred type. Order either the standard trolley item # M920109, or pivot trolley, item # M920745. See images on the right.
- Fixed lifters: System accommodates current Savaria Monarch and future M-Series fixed lift models, as well as Handicare fixed lift models outfitted for use on standard Savaria track.
- ERP visibility: The item has been added to the ERPs of both Handicare and Span.
- Pricing on M921682 matches pricing of discontinued system 340000.
- Lead time: System ships from Magog location in 10 days or less from receipt of order.
- No restrictions: As is true of 2-post models, because it is free-standing and requires no cutting, there are no training-related restrictions on dealer purchases of this system.
- Documentation: The owners manual can be found on the Savaria Dealer Portal, and has been added to Handicare MDC. As there is currently no literature or specification sheet for this item, the manual can be provided to dealers where documentation is required.
