

ReTurn7500™

SystemRoMedic™

Patented design*
Standard-height
rising ladder, suits most
adult users
Activates the user
Eliminates heavy lifting
for the caregiver

Safe and active sit-to-stand and transfer – without any heavy lifting

ReTurn7500 is an easy-to-use and incredibly effective assistive device for sit-to-stand and transfer, but it is also a rehabilitation device. ReTurn7500 enables safe and active sit-to-stand and transfer to or from bed, wheelchair or toilet. ReTurn7500 can also be used to facilitate repositioning farther back in a chair or wheelchair. For the caregiver, ReTurn7500 enables easy transfers without any heavy lifting. For users who still retain some degree of strength, ReTurn7500 stimulates the natural pattern of movement during sit-to-stand, while at the same time strengthening the muscles and functional ability. This makes it the ideal assistive device in a rehab unit, and a user who uses ReTurn7500 at home can normally live at home longer with the help of only one caregiver.

ReTurn7500

ReTurn7500 and ReTurn7400 have the same stable base plate, which makes it possible to change between standard-height and low rising ladders, and thereby cover a broader range of needs and get the best use out of the product.

Product specification

Item No.	Product	Description
7500	ReTurn7500	Transfer platform, complete with standard-height rising ladder
7500i	ReTurn7500	Transfer platform, complete with standard-height rising ladder, with an opening for hooking of ReTurnBelt
7501	Rising ladder, standard height	For ReTurn7500 with serial numbers from 373317697500500001 and for ReTurn7400 with serial numbers from 373317697400500001
7501i	Rising ladder, standard height	With an opening for hooking of ReTurnBelt, for ReTurn7500 with serial numbers from 373317697500500001 and for ReTurn7400 with serial numbers from 373317697400500001
7401	Rising ladder, low	For ReTurn7400 with serial numbers from 373317697400500001 and for ReTurn7500 with serial numbers from 373317697500500001

Different models of ReTurn provide solutions for all situations and users

The basic principle behind ReTurn is that the user's own strength and ability must be utilized and improved. All ReTurn models therefore help to activate the user and encourage the user's natural patterns of movement.

More information about the different models of ReTurn and all accessories can be found at www.handicare.com/us.

Easy-to-use and very versatile

ReTurn7500 is a manual sit-to-stand and transfer aid that is very easy to understand and use, both for the user and the caregiver. ReTurn7500 is also a versatile product that can be used in several different ways to safely and efficiently assist a user during sit-to-stand and positioning in a seated position, as well as for short transfers indoors. In addition, ReTurn7500 is also an excellent training device, making it an ideal aid to the rehabilitation process. ReTurn7500 has a rising ladder of standard height and is appropriate for most adult users. ReTurn7500 is also available in a new version on which the rising ladder (patent pending**) has an opening for quick and easy hooking of ReTurnBelt. Both versions of ReTurn7500 are intended for users weighing max. 150 kg/330 lbs.

Incredibly easy to manoeuvre

ReTurn7500 has a unique, patented* design which makes the transfer platform incredibly easy to manoeuvre. ReTurn7500 rolls, turns and pivots smoothly and easily on all surfaces, even in confined spaces. The device is easily positioned close to a bed, wheelchair or toilet, and moving ReTurn7500 requires minimal exertion, even with a larger and heavier user.

Stable and secure base plate

A low centre of gravity and a broad underlying support surface, with wheels at all corners, make the base plate stable and safe. Two large, fixed and lockable centre wheels make ReTurn7500 easy to roll and directionally stable, while the castors at the corners make it very easy to manoeuvre.

The rising ladder allows space for a natural pattern of movement and closeness

ReTurn7500 is equipped with a rising ladder that is fully open at the bottom, while the upper section allows many possibilities for grasping the ladder, including a central 'power grip'. The rising ladder leans forward, away from the user, allowing the user plenty of space to get really close to the assistive device, so as to be able to 'climb' and/or pull himself up while rising to a standing position. The user is also supported by the ladder during standing training and transfer. The design allows plenty of work space also for the caregiver, who can remain very close and help to support the user from different directions. The lower leg supports can be adjusted both vertically and laterally. They can also be angled, making it easy to individually adapt the settings according to the user's height and other factors. This function also makes it possible for several individuals to use the same ReTurn7500. The lower-leg supports on the new version of ReTurn7500 are equipped with extra padding as standard.

ReTurn7500 is easy to assemble and disassemble for transport and storage.

Technical information

SWL _____ 150 kg / 330 lbs
 Overall height _____ 1150 mm / 45.28"
 Base plate, length x width x height _____ 685 mm x 570 mm x 40 mm / 26.97" x 22.44" x 1.57"
 Weight _____ 16.5 kg / 36.38 lbs

0954	Bag	For ReTurn7500/7400

***) Patent: SE-0401517-8

SystemRoMedic™ is a complete solution for easy transfers. The concept encompasses four product areas that meet most needs in different transfer situations.

Transfer, between two locations. **Positioning**, within the same location.

Support, for mobility. **Lifting**, both manual and mechanical.
