Re-Order #	Description	Size	Weight	Unit
914732	House Gel Maze	19"W x 12"D	2 lbs	Each

Purpose

The house gel maze assists the child in learning to identify many common items that are found in a typical house or apartment. The task of moving the marble around the house helps in developing eye hand coordination and finger dexterity. The process also helps in reducing boredom and trains the child to concentrate.

Easy to Use

The sensory pad should be placed on any flat surface that is convenient to the child. A listing of the house/home items could be referred to and the child should be asked to locate the item either with their finger or by pushing the marble to the location. The numbering identifiers should be used to develop number skills.

Easy Care

The gel-filled house can be cleaned either soap and water, liquid disinfectant or PDI wipes.

Caution

Use under the supervision of an adult and do not use for children cognitively under three (3) years old. Although the gel and vinyl are non-toxic, use of the product should be discontinued if the vinyl seal is broken.
