

Lynacare™ HC107 Hi-Low HOSPITAL BED

The innovative **Lynacare™ HC107 Hi-Low Hospital Bed** has been designed by HomeCare Hospital Beds for all home and long-term care settings. This modern bed provides comfort and safety for both patients and caregivers with hi-low bed frame height, auto contour, dual controls and a central locking mechanism. The HC107 has an assortment of comfortable position configurations including a dining chair position that is easily adjustable with just the touch of a button on the footboard-mounted control panel or hand pendant.

The control panel grants caregivers the capability and convenience of adjusting the bed's position without requiring the hand pendant or locking out certain adjustments on the hand pendant. The HC107 features built-in under bed lighting that illuminates the surrounding floor space and a backlit hand pendant which makes adjusting the bed positions easier at night. The versatile bed deck design of the HC107 can be expanded to 88" long and 42" wide for maximum comfort and safety for all body types up to 500 lbs.

EXCLUSIVE FEATURES

Hi-Low Bed Height

The HC107 bed frame features height mobility options as low as 7" off the floor to a 30" working height for caregivers and nurses.

Dining Chair Position

The Dining Chair Position comfortably transitions patients to a fully seated position with a safe and gradual raise.

Built-In Width & Length Extension

The sleep deck can expand from 35" to 39" to 42" in width and from 80" to 84" or 88" in length without the need for any additional tools.

Advanced Positions

The HC107 features advanced bed positions including Cardiac Chair Position, Trendelenburg and Reverse Trendelenburg.

Auto Contour

The auto contour feature on the HC107 elevates the knee and backrest sections of the bed at the same time to help the patient stay in place when sitting upright.

Dual Controls

The HC107 features a backlit hand pendant and a built-in nurse control panel on the footboard which provides caregivers with the ability to adjust the bed position.
