

GMFCS
Levels II-IV

I am your anterior walking aid, and will assist you in your very first attempts to walk.

I can hardly wait to start off with you! I will support your balance and simultaneously train your torso musculature. You can adapt my wheelbase to suit: if you adjust it so that it is somewhat shorter, I become highly manoeuvrable and you can move me better. I give you more security and support with a long wheelbase. If you find it hard to walk in a straight line, I am happy to assist you with my direction locks.

Handles

can be adapted in height and width.

Aluminium frame

highly compact; sizes 2+3 can be folded.

Friction brakes on the rear wheels

throttle the speed so that you can concentrate completely on walking.

Storage basket

provides space for toys or drinks.

Direction locks

support you walking straight ahead.

PU tires

are highly resistant.

Three dimensionally-adjustable forearm supports
stabilise your gait pattern.

**Optional parking handbrake**

provide you with more safety and control - also in combination with the forearm supports.
