Product Description

Add a delicate chime to your playground with the Metallophone. The 15 different metal keys are tuned specifically to emit a different key, allowing for a large musical range. The multiple colors alternating on the keys visually dazzle as the music aurally stimulates throughout the playtime. Included are two mallets, each attached to the Metallophone allowing for convenience in finding them and discouraging losing or stealing them. The number of mallets allows for more than one child to play on the Metallophone at the same time, promoting sharing and friendship.
