

TCCC/TECC Modular Training System

REV061918

A Turnkey Solution for Training Centers...

The TCCC/TECC Modular Training System from North American Rescue provides all the necessary tactical medical and casualty extraction/evacuation equipment needed when teaching the PHTLS TCCC Certification required tasks for completing the Tactical Combat Casualty Care (TCCC) course. This system is available as a turnkey solution for training centers and educational institutions. Each training kit is designed to equip up to twenty (20) students and consists of three modules:

Module One – Skill Stations: Provides the necessary equipment to perform PHTLS TCCC Certification required tasks when training at individual skill stations. Includes all the necessary equipment to instruct up to twenty (20) students in the treatment of the leading causes of potentially preventable death in the tactical environment. Contents are packaged in a self-contained, wheeled, rigid case with internal dividers to keep the equipment organized and easy to inventory. Addresses extremity hemorrhage, wound packing, chest seal application, needle chest decompression, junctional hemorrhage, basic airway adjuncts, surgical airway, splinting, hypothermia prevention & management, IV skills and eye injuries.

Module Two – IFAKs: Provides twenty training IFAKs for student use during trauma lanes or scenarios. Each IFAK contains the necessary equipment for initial TCCC/TECC care in an easy to attach modular carrying bag that can be worn as a drop-down leg rig attached to a belt with a quick-detach buckle system. The IFAK also has a removable belt and leg strap so it can be MOLLE attached to a vest as another carrying option. The kit contains 20 pre-packed TCCC Training IFAKs in a hard, wheeled case that allows for easy transport and storage.

Module Three – Extraction: Provides various high-threat extraction devices and casualty evacuation systems to train students in different options to move casualties during the all three TCCC Phases of Care. Kit includes High Threat Extraction drag devices, versatile casualty movement Hasty Harness, poleless/non-rigid litter option and the collapsible quad-fold rigid evacuation platform standard – Talon II 90C Litter.

Complete System Dimensions:

Hard Storage Case:

External – L 30.75 in. x W 20.5 in. x D 11.6 in.

Internal – L 28.5 in. x W 17.5 in. x D 10.5 in.

Weights: Module One: 53 lb | Module Two: 59 lb | Module Three: 45 lb
