Orthopedic Draping & Dressing Systems

DEROYAL ORTHOPEDIC DRAPING & DRESSINGS

Just as your best work is based on excellence, so is ours. DeRoyal's Orthopedic Drapes and Dressings are designed to meet the rugged demands of surgery for both the clinician and the patient. These high-quality products cover each procedural phase from draping to dressing. Our padding, bandages and stockinette cover cost containment as well, for results that can be seen even in the accounting department.

ELASTIC ORTHOPEDIC BANDAGES

Elastic Bandages

- Made from high quality elastic
- For over-wrapping compression dressings following extremity surgery
- Available in tan or white
- Superior patient comfort and breathability
- Requires less force to stretch, yet provides maximum compression
- Greater range of stretch power allows clinicians to set compression
- Honeycomb provides even greater stretch with greater compression range
- Honeycomb's scalloped edges prevent rolling
- Provided sterile if desired for application directly on top of surgical site
- Available with either metal clip or hook-and-loop closure
- Economy line available
- Latex free

WRAPPING UP CLINICAL SUCCESS

DeRoyal Orthopedic Dressings are with you through each procedural step toward a successful outcome.

Step 1

Impervious Stockinette

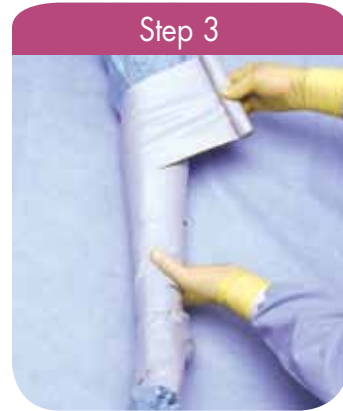

Impervious Stockinette from DeRoyal provides a sterile limb cover following the prep of the operative extremity. It can be rolled past the surgical site or left partially unrolled just below the site depending on surgeon preference.

Step 2

Cohesive Bandage

Our Self-Adhering Sterile Cohesive Bandage can be quickly cut to the exact length to hold stockinette in place during a procedure. It may also be used as a dressing over wrap post-operatively.

Step 3

Esmark Bandage

DeRoyal's Esmark provides excellent compression to exsanguinate the extremity prior to the invasive phase of a procedure. It may be applied over a sterile stockinette in an overlapping motion beginning at the distal end of the limb, continuing past the operative site.

Step 4a

Cast Padding Or Apex™

Any of DeRoyal's varieties of sterile cast padding can be wrapped on the limb in order to control post-operative swelling.

OR

Step 4b

Jones Dressing

The highly absorbent Jones Dressing is often chosen instead of cast padding to control post-operative swelling without impairing circulation.

Step 5

Elastic Bandage

DeRoyal's Sterile Elastic Bandages can be used as the final wrapping layer of a post-operative extremity dressing. It is generally applied on top of a bulky cotton wrap, such as a Jones Dressing or Cast Padding.

Orthopedic Dressings

ORTHOPEDIC WOUND DRESSINGS

DeRoyal also has advanced Wound Care products that are ideal for orthopedic, open and arthroscopic post-operative applications. Complete product details are available on request or can be accessed at www.deroyal.com.
