TROUBLESHOOTING

This page summarizes the most common problems that you may encounter with your Spa Capsule. If you are unable to solve your specific problem with the solutions listed below, please contact the service center immediately.

Problem:	Potential Solution:
The Spa Capsule doesn't turn on:	Ensure that the local voltage matches the required voltage; Try another outlet; Unplug and plug it back in; Check the power switch or fuse.
The is no steam:	Check the water pipeline for kinks or blockage, make sure your waterline is connected properly.
The display isn't on:	Ensure the capsule is plugged in and turned on; check the status of the fuse.
The lights aren't functional:	Ensure the capsule is plugged in and turned on; Check on the wiring; Turn on the switch.
No Ozone Operation:	Turn on the switch, and make sure the option is selected.
The MP3 player doesn't work:	Ensure the device is plugged into the USB port, and the MP3 option is selected.
The speakers don't work:	Troubleshoot the MP3 player first; check on wiring; replace the speaker itself.
The Capsule is abnormally warm:	The capsule has been in use for too and is overheating, turn it off and unplug it for at least 60 minutes and resume use.

If the problem is not listed above, please try the following suggestions:

1. Turn off the Spa Capsule and unplug it
2. Wait for 60 minutes
3. Plug the product back into a different outlet and restart it
4. If the problem persists, please contact our service center

CLEANING & MAINTENANCE 8

Cleaning:

1. Interior:

Clean the interior of the pod often by using a microfiber cloth and water. Refrain from using harsh chemicals on the interior of the pod.

2. Water Caches:

There are two caches where loose water will begin to pool. One underneath the floorboard, and one behind the capsule. These two reservoirs should be routinely drained and emptied.

3. Exterior:

You may use any everyday cleaning solution to disinfect and clean the exterior of the pod. Never use any liquids on or near the electrical outlets, wires, or control panel.

Maintenance:

- When not in use, the capsule should remain unplugged and powered off.
- Before use, the user should always check for cracks in the exterior, or frayed wires.
- If any defect is present, please contact service@osakititan.com before using capsule again.

SAFETY INFORMATION 1

When using the spa capsule basic precautions should always be followed to reduce the risk of electric shock, burns, fire, or injury. Please read the following precautions before using the spa capsule.

- Make sure the power cord is plugged into the proper outlet to reduce the risk of short-circuit and electrical fire.
- We highly recommend using a surge protector to avoid damage.
- Do not use capsule on a slanted surface where the risk of rolling is high.
- Do not use outside or in areas of heavy direct sunlight.
- When not in use, unplug the capsule to avoid possible damages from power outages/surges that may cause serious damage or harm.
- Never plug or unplug the capsule's power cord with wet hands or a wet cable.
- There should never be more than one person in the capsule at a time.
- Do not use the capsule if your head does not comfortably and fully extend outside of the hole.
- Close supervision is imperative when children or disabled persons are on or near the capsule.
- Children, pregnant women, disabled individuals, patients with high blood pressure, and people with heart disease should not use this device.
- Burns may result from improper use.

SAFETY INFORMATION

2

- This spa capsule is intended for use as described in this instruction manual. Do not use attachments or modifications other than those suggested by the manufacturer.
- Do not stand on the seat and do not sit or stand on the armrest, backrest, or lid to avoid serious injury or damage to the capsule.
- Avoid falling asleep during use.
- Ensure the capsule is clean and operational before use.
- Do not move the capsule by pulling on cords or hoses.
- Make sure there are not children or animals underneath or behind the capsule before use.
- If you find any cracks or defects in the capsule you should contact the service center immediately.
- Please consult your doctor if you have concerns before using the capsule.
- If you experience pain or lightheadedness while using the capsule cease use and consult your doctor immediately.
- Do not use the capsule for more than 45 minutes at a time.
- Keep hands and appendages away from the lid while closing.
- This is a recreational item and should not be used as a substitute for appropriate medical treatment .
- Do not repair circuits or wiring by yourself, please call the distributor or send an email to a service specialist.

HOW TO USE

7

Functions:

1. Steam Sauna:

By simply filling the water reservoir with water you can experience a conditioning and relaxing steam massage. This will hydrate your skin and open your pores.

2. Fragrance Therapy:

You have the option to add essential oils, herbs, milk, or honey to the water reservoir in order to experience a calming fragrance in addition to your steaming refresh. Different essential oils provide a variety of benefits for you to choose from.

3. Auditory Relaxation:

Listen to your favorite music or calming sounds by plugging in an external device via USB to compound the relaxing effects of your spa capsule.

4. Ozone Rejuvenation:

By activating the Ozone system, you can clear out your pores of toxic metals. This is achieved through 'ozone sterilization', a process unique to your spa capsule.

5. Chromotherapy:

Activate the chromotherapy function on your spa capsule to begin a calming series of fading lights. This rhythmic set of lights can relax your body, soothe the mind, and improve metabolism.

HOW TO USE

6

Control Panel:

1. Power Switch: Press once to power the Spa Capsule on, and again to power it off.

2. Ozone Toggle: Turn on for an increase of oxygen in the system. Suggested use is for 10 minutes.

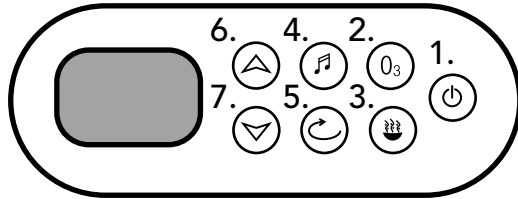

3. Steam Control: Press to begin the steam exfoliation.

4. Music Toggle: Turn your music off and on by pressing this button.

5. Cycle Through Controls: Cycle through control of Volume, Temperature, Shut Off Timer, and Current Song.

6. Increase: After cycling to your desired function you may increase the volume of your music, switch to the next song, increase the temperature, or increase the time on your sauna session.

7. Decrease: After cycling to your desired function you may decrease the volume of your music, replay the last song, decrease the temperature, or decrease the time on your sauna session.

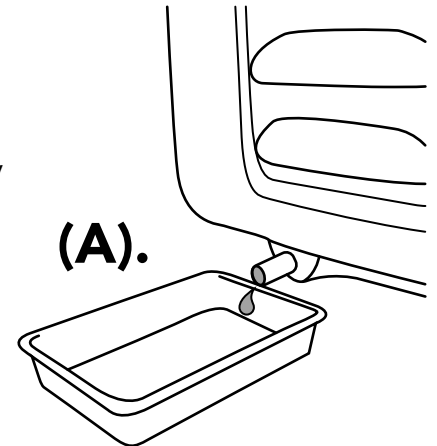

PREPARATION & SETUP

3

Set Up:

1. Positioning:

Position your capsule on a flat surface with easy access to a 120V outlet, making sure to leave enough room behind the capsule for the water reservoir.

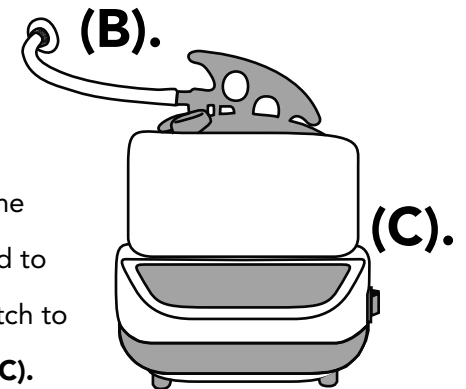

2. Connections:

Begin by connecting the main power supply into a nearby surge protector or wall outlet. Place water reservoir underneath drainage pipe behind the spa capsule (A).

3. Steam Generator:

Ensure the exterior steam generator is plugged in and the white steam hose is connected to the lid (B). Flip the power switch to the on position before using (C).

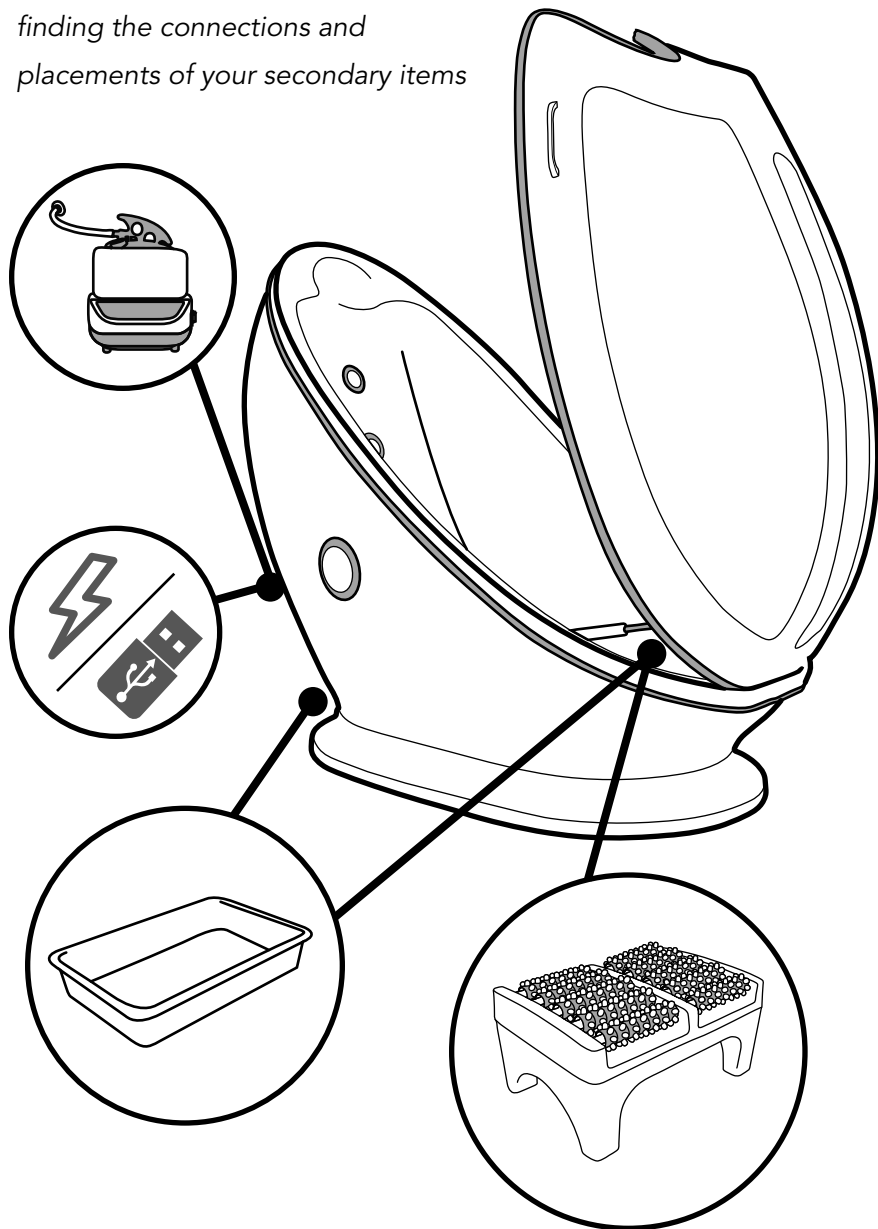

PREPARATION & SETUP

4

Set Up:

This diagram should assist you in finding the connections and placements of your secondary items

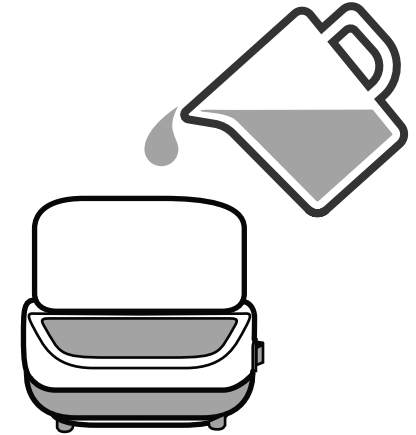

HOW TO USE

5

Preparation:

- Begin by filling the steam generator with water. If you'd like to add essential oils, do so before turning device on, as to avoid potential harm.
- Position the adjustable seat to the appropriate height.
- Press the power button on the control panel and activate the desired mode(s). (i.e. steam, ozone)
- Once you've selected all of your preferred setting, climb inside the spa capsule and secure the lid.

Exiting:

- When finished with you sauna session, simply apply pressure to the lid to open it.
- Upon exiting the spa capsule, make sure to press the power button to conclude the spa capsule functions.
