Cutting-Edge Technology Meets Comfortable Viewing

Aven's SharpVue Plus combines cutting-edge technology with comfort and ease of use. The SharpVue Plus has carried over all the popular features of the original SharpVue system, such as the attractive compact design and its fixed 9-inch working distance. This new model also retains the dual USB/DisplayPort outputs to connect to either a PC or an HD monitor. The SharpVue Plus's revamped camera offers improved image quality at up to 30x magnification, with a DisplayPort output that provides a real-time 1080p HD video image with little-to-no lag time. While users can still utilize the SharpVue's software for image and video capture, the SharpVue Plus now features a USB port for saving images to a USB drive, no computer required.

Features:

- 30x optical, up to 300x digital magnification
- DisplayPort and USB output
- Built-in LEDs with On/Off switch
- Fixed 9-inch working distance
- Auto focus camera
- Includes remote control for on-screen settings

SharpVue Plus	
Item Number	26700-136
Magnification	30x optical, up to 300x digital
