

Post-Op Shoe

The post-op shoe is designed for ease and comfort, with an adjustable velcro closure to allow for even compression and security.

FEATURES

- Poly-cotton blend for breathability and comfort
- Semi-rigid sole: provides superior control of forefoot motion to ensure post operative healing remains undisturbed
- Helps with the recovery of soft tissue procedures, and relieves pain associated with Morton's Neuroma and bunion
- Can be adjusted as needed to meet the needs of the specific resident
- Semi-rigid outsole provides stability and minimizes flexure
- Breathable nylon mesh upper
- Latex free
- Simple velcro strip closure
