OPERATION

Adjusting Leg Height

Push in the leg height adjustment lock button and move leg extension to the desired height position — you will hear it click into place. Ensure that all four legs are locked into place at the same height and all leg height adjustment lock buttons protrude fully through adjustment holes.

Center of Balance During Use

The point where the Bath Seat will tip forward, rearward or sideward is determined by its center of balance and stability, and the center of balance and stability is affected by the user's body position and weight distribution. If you fail to heed the following warnings, falling or tipping may occur and could cause severe personal injury.

Have someone help you until you know the balance points of your Bath Seat and how to avoid tipping.

Do not put downward weight on one armrest at a time. If using the armrest for balance, hold both armrests at once to distribute your weight equally.

Do not put downward weight on the backrest.

Do not reach or lean if you must shift your weight to do so. Ask for help or use a device to extend your reach.

Never try to reach an object if you must move forward in your seat and your buttocks do not stay in full contact with the seat.

Never lean backward to reach an object.
