At Arjo, we believe that empowering movement within healthcare environments is essential to quality care.

Our products and solutions are designed to promote a safe and dignified experience through patient handling, medical beds, personal hygiene, disinfection, diagnostics, and the prevention of pressure injuries and venous thromboembolism.

With 60 years caring for patients and healthcare professionals, we are committed to driving healthier outcomes for people facing mobility challenges.

Mobility Gallery

The Mobility Gallery uses colour coded icons from A to E to represent the 5 levels of functional mobility. Each level of mobility is personified in the characters Albert, Barbara, Carl, Doris and Emma.

Mobility, as well as the patients' self-reliance, largely determines the physical assistance someone needs and the physical loads (static and dynamic) on the caregivers.

Reduced mobility will result in an increased need for help and eventually more equipment to assist. Without the right equipment, this assistance results in more physical loads for the caregivers. Good quality of care not only takes the patient's mobility into account, but also the caregivers'health. Quality of work and quality of care are linked when it comes to mobility.

These icons are also used within the Mobility Classification Tool and referenced in the International Standardization Organization Technical Report 2011.¹

¹ International Standardisation Organisation Technical Report: Ergonomics: manual handling of people in the healthcare sector. TR12296 (2012)

QR Codes

Visit the webpage

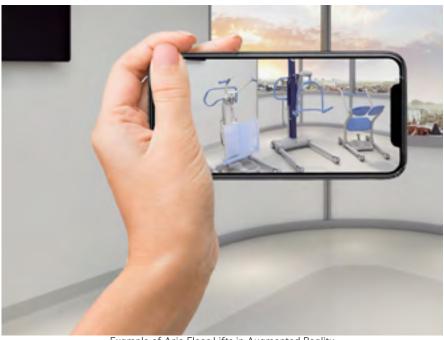

If you want more information about the products contained within this document, "Visit the webpage" QR Code. please point out the standard Camera application of your mobile device (iOS or Android) to scan it and follow the popup. It will lead you to the Arjo webpage dedicated to the specific product.

Example of The QR Code leads to the Arjo website

Augmented reality

Some products have a "View in AR" QR Code on their main page. You can apply the same scanning behavior with your Mobile Phone or Tablet, to see the product in Augmented Reality, at scale. Make sure the ambient light in the room is good enough, and point your device to the floor or ceiling to see the model in Augmented Reality.

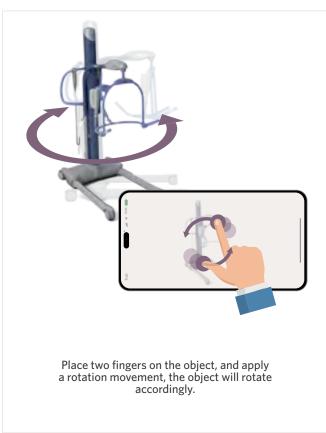

Example of Arjo Floor Lifts in Augmented Reality

Augmented reality

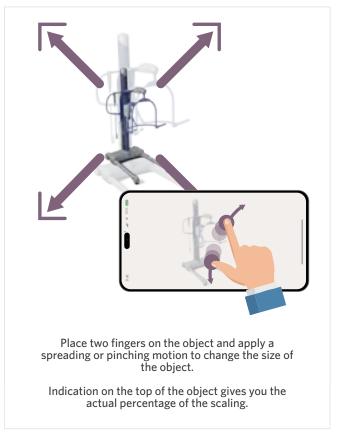

You can move around the product to see details. You can also interact with the product, using intuitive finger movements on your device screen. Thus, you can move the virtual object on a table, modify its size or apply a rotation to it, in order to place it in the correct axis to pass a door, for example.

Note that, at 100%, the virtual object is approximately at its real life scale.

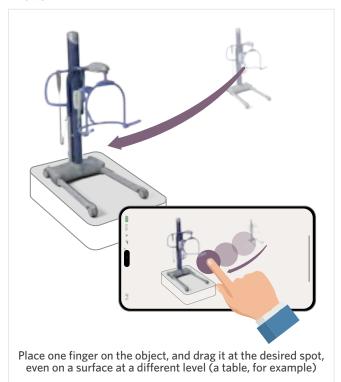

Rotate

Scale up/down

Move

Note that you can combine this movement with the camera/ device movement to move the object to a place not reachable otherwise.

Standing and Raising Aid

Sara® Flex

Designed to make every-day transfer and care tasks easier, Sara Flex equips one caregiver with the ability to assist a patient or resident from a seated to a standing position, in one natural movement.

ARJO MOBILITY GALLERY

С

C. Able to partially bear weight on at least one leg. Uses a wheelchair for moving a distance. Please contact Arjo for further information.

SCALE (OPTION)

Built in electronic scale shows the patient's weight on the display of the hand control.

CAREGIVER HANDLE ·

Curved handle enables the caregiver to choose where to hold.

EASY-TO-USE HAND CONTROL WITH DISPLAY

The hand control is on a long flexible cord that enables the caregiver to stay close to the patient throughout the transfer.

LOW HORIZONTAL FOOTPLATE

Keeping the patient's feet close to the ground means their knees are not raised too high, making the standing task easier.

PATIENT HANDLE

The contrast-coloured angled patient handle positions the hands, wrists and elbows throughout the sit-to-stand movement.

FLEXIBLE SILICONE LEG SUPPORT

Curved design with a soft and flexible surface that supports the lower legs and knees throughout the sit-to-stand

Requiring no adjustments, the large surface caters for a broad range of patients while delivering good comfort.

FLEXIBLE SILICONE LEG STRAP

Positioned low and with and multiple adjustment options to ensure patients can be securely positioned from a seated to a standing position.

TOTAL LOCK BRAKES

Both axis of the wheels are lockable.

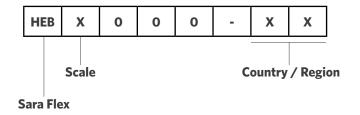

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	200 kg (440 lbs)
Lift weight (incl battery)	53 kg (117 lbs)
Minimum total storage height	1162 mm (45 3/4")
Minimum lifting height	991 mm (39")
Maximum lifting height	1518 mm (59 3/4")
External width legs closed	660 mm (26")
External width legs open	1029 mm (40 1/2")
Internal width leg closed	530 mm (20 7/8")
Internal width leg open	899 mm (35 3/8")
Leg clearance (floor to top of legs)	108 mm (4 1/4")
Chassis clearance (floor to bottom of chassis)	23 mm (15/16")
Lift total length	996 mm (39 3/16")
Turning radius	1208 mm (47 9/16")

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Sara® Stedy & Sara® Stedy Compact

Sara Stedy and Sara Stedy Compact enable a single caregiver to assist patients or residents perform sit to stand transfers throughout the day.

ARJO MOBILITY GALLERY

B. Ambulatory to some degree but may use a walking frame/crutches for support. Please contact Arjo for further information.

R

SARA STEDY

Designed for patients 149-193 cm (4'11"- 6'6"), and weighing up to 182 kg (400 lbs).

SARA STEDY COMPACT

Designed for smaller patients, 138-172 cm (4'6"- 5'8") tall and weighing up to 182 kg (400 lbs).

CROSSBAR HANDLE ·

Allows the patient to support themselves actively by pulling.

PIVOTING SEAT OPENING

The pivoting seat can be moved out to enable the patient to stand, and provides an angled seated support during the transfer.

KNEE SUPPORT -

The knee pad provides support for raising into standing and also to the patient's legs during the transfer.

TOTAL LOCK BRAKES -

Both axis of the wheels are lockable

PEDAL-OPERATED CHASSIS LEGS -

Easily adjusted for access to wide chairs.

- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Sara® Plus

Sara Plus is a powered standing and raising aid designed for active transfers, balance, stepping and gait training.

ARJO MOBILITY GALLERY

C. Able to partially bear weight on at least one leg. Uses a wheelchair for moving a distance. **D.** Unable to weight bear through feet. Is able to sit if well supported. Please contact Arjo for further information.

SCALE (OPTION)

The scale can be used to weigh patients, and monitor their weight-bearing capacity when Sara Plus is used without the footplate.

ARC REST

The arc rest supports the patient's arms and upper body and can help them support their weight through their shoulders in addition to their feet.

DUAL CONTROLS

Dual controls on the mast and the hand control. Using the hand control gives the caregiver the opportunity to move and stay close to the patient and maintain good eye contact throughout the process.

The pro-active knee pad provides support and stability, while also allowing natural forward movement of the knees and flexion of the ankles during standing and sitting actions.

DETACHABLE FOOTPLATE

Detachable footplate enables stepping and gait training with the patient's feet directly on the floor.

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	190 kg (420 lbs)
Lift weight (incl battery)	78.7 kg (173.5 lbs)

Chassis clearance (floor to bottom of chassis)	30 mm (11/5")
Lift total length	1033 mm (40 5/8")
Turning radius	1235 mm (48 5/8")
Lift protection class	IPX4
Hand control protection class	IPX7
Battery	24V, 6 Ah
Battery charge indicator	

Service meter - displays the total time in use (hours)

Emergency stop and system failure override

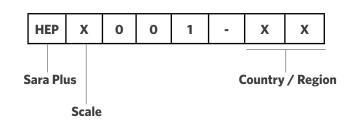

Automatic safety cut out if lowered onto an obstacle

Low-friction castors, the rear two with brakes

APPROVALS

The product is in compliance with current legislation and applicable product standards.

Safe working load (SWL)	190 kg (420 lbs)
Accuracy - Standard scale	2-120 kg +/- 100 g (4-240 lb +/- 3.5 oz) 120-190 kg +/- 1000 g (240-418 lb +/- 7 oz)
Power supply	Main lift battery
Operating temperature range	+5°C to +35 °C (+41 °F to +95 °F)
Weight - scale unit	Approx 10.6 kg (18 lbs)
Protection	IP 24
In accordance with	EN ISO 10535 IEC 60601-1

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Walker®

Walker provides the support for taking that first step - for both patient or resident and physiotherapist.

ARJO MOBILITY GALLERY

В

B. Ambulatory to some degree but may use a walking frame/crutches for support. Please contact Arjo for further information.

HAND CONTROL

Walker has a hand control that allows the physiotherapist to stay close to the patient.

STRAIGHT STEERING

Straight steering to assist the patient walk in a straight line and to facilitate transportation in the corridor.

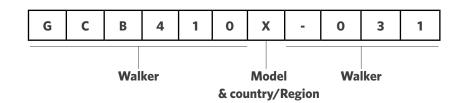

PRODUCT INFORMATION

GENERAL			
Maximum safe working load	136 kg (300 lbs)		
Lift weight (incl battery)	53 kg (117 lbs)		
Minimum total storage height	1165 mm (45 7/8")		
External width legs closed	843 mm (33 1/4")		
Internal width leg closed	694 mm (27 3/8")		
Leg clearance (floor to top of legs)	165 mm (6 1/2")		
Chassis clearance (floor to bottom of chassis)	117 mm (4 7/8")		
Lift total length	1040 mm (41")		
Turning radius	1320 mm (52")		
Lift protection class	IPX4		
Hand control protection class	IPX7		
Battery	24V, 4 Ah		
Emergency stop and system failure override			
Automatic safety cut out if lowered onto an obstacle (in electric version)			
Low-friction castors, the rear two with brakes			
TRANSPORT, STORAGE AND OPERATION (APPLIES TO ALL WA	LKER MODELS, EXCEPT CHARGES)		
Temperature range	Transport: -20°C to +70°C (-4°F to +158°F) Storage: -20°C to +70°C (-4°F to +158°F) Operation: +10°C to +40°C (+50°F to +104°F)		
Relative humidity range	Transport and Storage: 10% - 80% Operation: 15% - 75%		
Atmospheric pressure range	Transport and Storage: 500 - 1100hPa Operation: 800 - 1060hPa		
Mode of operation	ED maximum 10% Maximum 1 minute ON Minimum 9 minutes OFF		
Start force	70N		
Rolling force	20N		
Push button force	<5N		
Brake force	105N		
Lever force	20N		
APPROVALS

- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Floor lifts

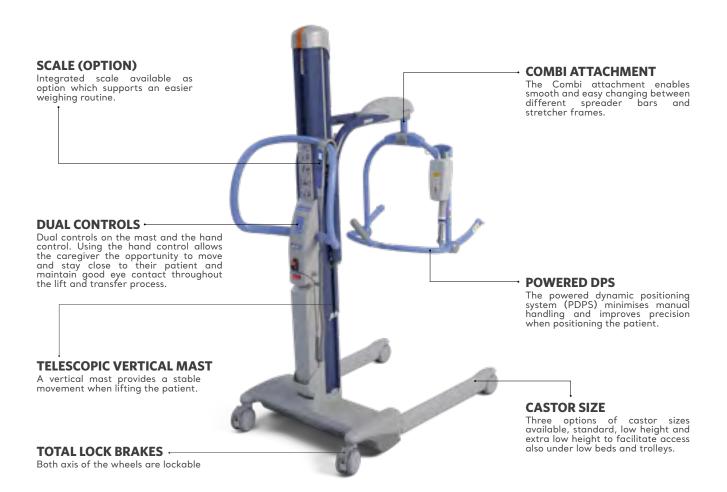

Maxi Move®

Maxi Move floor lift is designed to enable a single caregiver to manage demanding everyday patient or resident transfer and repositioning tasks. It is a versatile solution that can be adapted using a variety of spreader bars to accommodate patient transfer needs.

ARJO MOBILITY GALLERY

D. Unable to weight bear through feet. Is able to sit if well supported.
 E. Difficulty maintaining sitting hence might remain lying/partially lying in bed.
 Please contact Arjo for further information.

Ferno Scoop Stretcher + Dual Loop Straps

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Maxi Twin®

The open design of Maxi Twin can enhance safe working practices for caregivers when performing transfers of dependent patients or residents.

ARJO MOBILITY GALLERY

D. Unable to weight bear through feet. Is able to sit if well supported.
 E. Difficulty maintaining sitting hence might remain lying/partially lying in bed.
 Please contact Arjo for further information.

SCALE (OPTION)

Suspended scale available as option which supports an efficient weighing routine.

MANOEUVRABILITY ·

The twin-mast design distributes the weight evenly and the large handholds enable the caregivers to manoeuvre the lift.

HIGH FRICTION SOLUTION

The friction solution reduces the spreader bar from swinging during patient transfers.

POWERED DPS

The powered dynamic positioning system (PDPS) minimises manual handling and improves precision when positioning the patient.

ERGONOMIC HANDLING

The Maxi Twin dual mast provides convenient positioning handles for the use by caregivers of a variety of heights.

TOTAL LOCK BRAKES -

Both axis of the wheels are lockable

With a choice of different loop spreader bar sizes and a 4-point spreader bar with powered DPS, there are options for patients with different needs.

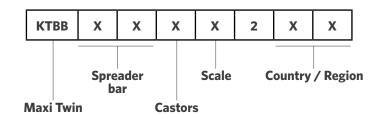

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	182 kg (400 lbs)
Lift weight (with spreader bar and battery)	58 kg (126 lbs)
Maximum lifting height	1460 mm (57 5/8")
Minimum lifting height	230 mm (9 1/8")
Lifting stroke	1230 mm (48 1/2")
Minimum total storage height	1370 mm (54")
External width legs closed	755 mm (29 3/4")
External width legs open	1371 mm (54")
Internal width leg closed	630 mm (24 7/8")
Internal width leg open	1231 mm (48 1/2")
Leg clearance (floor to top of legs)	115 mm (4 5/8")
Chassis clearance (floor to bottom of chassis)	31 mm (11/5")
Lift length	1298 mm (511/8")
Turning diameter	1440 mm (56 2/3")
Lift protection class	1440 mm (56 2/3)
Hand control protection class	IPX7
Battery shows in disease.	24V, 2.5 Ah NiMH
Battery charge indicator	
Emergency stop and system failure override	
Automatic saftety cut-out if lowered onto an obstacle	
Low friction castors, the rear two with brakes	
BATTERIES Battery	24 V DC, 2.5 Ah NiMH Arjo NEA0100-083
HAND CONTROL	24 V DC, 2.5 ATTNIWITATIONEAUTO0-003
It is made out of extremely durable material with an integrated hook	IPX7
The caregiver has complete control of the following powered features	Raising and lowering of the lift Opening and closing of chassis legs Powered DPS
SAFETY FEATURES	
Emergency stopping device (red button)	Stop all electric functions
Automatic safety cut-out	To prevent raising excess weight
System failure lower override (red ring)	In case of control handset/dual switch malfunctioning, with a resident/patient still supported by the sling, the lowering process can be continued
Automatic stop function	To avoid lowering jib or spreader bar on the resident/patient or any obstruction
Medical equipment	Type BF
Compliant with	CAN/CSA C22.2 NO.601 1-M 90, IEC 60601-1-2, UL 60601-1, ISO 10993, ISO 12182 and ISO 10535

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	160 kg (350 lbs)
Lift weight (with spreader bar and battery)	48 kg (103 lbs)
Maximum lifting height	1375 mm (54 1/8")
Minimum lifting height	290 mm (11 3/8")
Lifting stroke	1080 mm (42 1/2")
Minimum total storage height	1125 mm (44 1/4")
External width legs closed	660 mm (26")
External width legs open	1105 mm (43 1/2")
Internal width leg closed	520 mm (20 1/2")
Internal width leg open	965 mm (38")
Leg clearance (floor to top of legs)	115 mm (4 1/2")
Chassis clearance (floor to bottom of chassis)	30 mm (11/4")
Lift length	1100 mm (43")
Turning diameter	1310 mm (51 1/2")
Lift protection class	IP24
Hand control protection class	IPX7
Battery	24V, 2.5 Ah NiMH
Battery charge indicator	
Emergency stop and system failure override	
Automatic saftety cut-out if lowered onto an obstacle	
Low friction castors, the rear two with brakes	
BATTERIES	
Battery	(2X) 24 V, 2.5 Ah NiMH Arjo NEA0100-083
HAND CONTROL	
It is made out of extremely durable material with an integrated hook	IPX7
The caregiver has complete control of the following powered features	Raising and lowering of the liftOpening and closing of chassis legsPowered DPS
SAFETY FEATURES	
Emergency stopping device (red button)	Stop all electric functions
Automatic safety cut-out	To prevent raising excess weight
System failure lower override (ring)	In case of control handset/dual switch malfunctioning, with a resident/ patient still supported by the sling, the lowering process can be continued
Automatic stop function	To avoid lowering jib or spreader bar on the resident/ patient or any obstruction
Medical equipment	Type BF
Compliant with	CAN/CSA C22.2 NO.6011-M 90, IEC 60601-1-2, UL 2601-1 and ISO 10535, ISO 60601-1-11

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Minstrel

Minstrel is the classic loop sling lift for your everyday transfer routines with dependent residents.

ARJO MOBILITY GALLERY

D. Unable to weight bear through feet. Is able to sit if well supported.
 E. Difficulty maintaining sitting hence might remain lying/partially lying in bed.
 Please contact Arjo for further information.

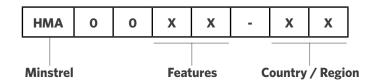

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	190 kg (419 lbs)
Lift weight (with spreader bar and battery)	56 kg (123 lbs)
Maximum lifting height	2000 mm (78 ³ / ₄ ")
Minimum lifting height	625 mm (24 ½")
Lifting stroke	1375 mm (54 1/8")
Minimum total storage height	1330 mm (52 3/8")
External width legs closed	645 mm (25 3/8")
External width legs open	1181 mm (46 1/2")
Internal width leg closed	545 mm (211/2")
Internal width leg open	1080 mm (42 ½")
Leg clearance (floor to top of legs)	110 mm (4 1/3")
Chassis clearance (floor to bottom of chassis)	45 mm (13/4")
Lift length	1275 mm (50 ¼")
Turning diameter	1420 mm (56")
Lift protection class	IPX4
Hand control protection class	IPX7
Battery	24V, 4 Ah
Battery charge indicator	
Service meter - displays the total usage of time (hours)	
Emergency stop and system failure override	
Automatic saftety cut-out if lowered onto an obstacle	
Low friction castors, the rear two with brakes	
LOW FRICTION CASTORS, THE REAR TWO WITH BRAKES	
Minstrel	190 kg (420 lbs)
All slings	Check the safe working load on the sling label
ELECTRICAL	
Battery type	Rechargeable sealed lead acid battery
Battery capacity	24 V DC 4 Ah
Hoist - protection class - intrusion of moisture	IPX4
Hoist - protection class - protection against electric shock	Internal electrical device
Nominal hoist voltage	24 V
Fuse	6A (Thermal over-current circuit breaker)
Fuse - PCBA	20A
Fuse - battery	30A
Battery charger type	FW7318M/24
Battery charger - protection class - protection against electric shock	Class II double insulated
Battery Charger part number (country code in parentheses)	NDA8200-INT
Operating force of controls	<5N

Medical equipment: Type B protection against electrical shock in accordance with IEC 60601-1.

FEA	TURES:
01	Mechanical chassis without scale
06	Mechanical chassis with scale
07	Electrical chassis with scale
11	Electrical chassis without scale

COUN.	TRY/REGION:
Empty	European plug of main lead (Type C)
UK	British plug of main lead (Type G)
US	American plug of main lead (Type A)
AU	Australia plug of main lead (Type I)
BR	Brazil power cord (Type C with inmetro approval)

General Note: Product and accessories availability may vary depending on your region.

	MLA4531	Loop Toilet w/o Headsupp.	M L XL
	MLA7000	Hammock Amputee Sling H/S	M L XL

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

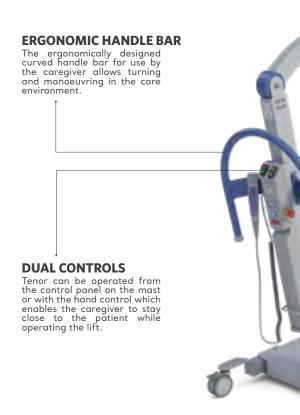

Tenor®

Tenor mobile floor lift is specifically designed for lifting and transferring plus-size patients.

ARJO MOBILITY GALLERY

D. Unable to weight bear through feet. Is able to sit if well supported.
 E. Difficulty maintaining sitting hence might remain lying/partially lying in bed.
 Please contact Arjo for further information.

SHAPED FOR STRENGTH

Curved jib design with a capacity to lift 320kg (704 lbs). Curved boom design maximises lifting clearance; important for 360 degree rotation of patient when lifted.

SCALE (OPTION)

Suspended scale available as option which supports an easier weighing routine.

SPREADING THE WEIGHT

Using the 4-point bariatric spreader bar provides a wider gap between the shoulder and leg hooks. This distributes the patient's weight and is designed to reduce the squeezing forces from sling.

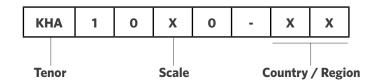

PRODUCT INFORMATION

GENERAL	
Maximum safe working load	320 kg (704 lbs)
Lift weight (with spreader bar and battery)	69.1 kg (152.3 lbs)
Maximum lifting height	1860 mm (73 1/5")
Minimum lifting height	600 mm (23 5/8")
Lifting stroke	1260 mm (49 5/8")
Minimum total storage height	1470 mm (57 7/8")
External width legs closed	745 mm (29 3/8")
External width legs open	1250 mm (49 1/5")
Internal width leg closed	625 mm (24 5/8")
Internal width leg open	1160 mm (45 5/8")
Leg clearance (floor to top of legs)	105 mm (4 1/8")
Chassis clearance (floor to bottom of chassis)	20 mm (3/4")
Lift length	1485 mm (58 1/2")
Turning diameter	1650 mm (65")
Lift protection class	IPX4
Hand control protection class	IPX7
Battery	24V, 4 Ah
Battery charge indicator	
Service meter - displays the total usage of time (hours)	
Emergency stop and system failure override	
Automatic saftety cut-out if lowered onto an obstacle	
Low friction castors, the rear two with brakes	
BATTERY TYPE RECHARGEABLE-SEALED LEAD ACID	
Battery	24V DC, 4 Ah, rechargeable sealed lead acid
The BDI (Battery Discharge Indicator) shows the status of the battery, whil	e the minute meter monitors and measures the activity of Tenor.
Handset - Protection class	IPX 7
LIFT – PROTECTION CLASS	
Lift nominal voltage	24V DC
Overload fuse	15 AMPS
SCALE	
Power supply	9V DC
Battery life	Approximatively 3000 readings

SPREADER BARS WITH COMPATIBLE SLINGS

SPACE REQUIREMENTS

- Blue area shows the minimum working area required for the staff to be able to use the floor lift in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lift and assisting carer.

Accessories

Maxi Cart 2

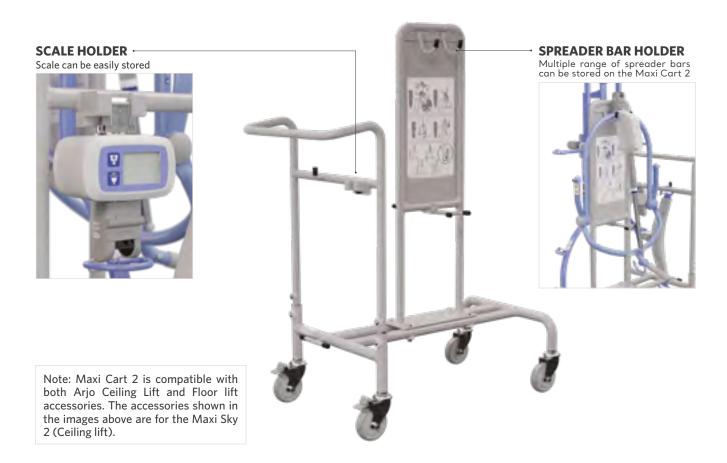

Maxi Cart[™] 2 cart is designed to support caregivers by reducing the amount of manual lifts within care facilities. Hanger bars and stretcher frames are detached from the cart as required, and re-attached when not in use.

Conveniently storing the hanger bars and stretcher frames on the cart ensures the equipment is always ready to use.

The trolley is also easy to manoeuvre and avoids caregivers having to carry cumbersome equipment around the care facility.

KEY FEATURES

	ARTICLE #	DESCRIPTION
1	MCA0002	Maxi Cart 2 (For spreader bars)

PRODUCT DIMENSION

Wall hooks

This storage system keeps the equipment close at hand while reducing space requirements.

PART NUMBERS

	ARTICLE #	DESCRIPTION
1	700-05959	Wall support kit (including 4 wall protective plates)
2	200-05952	Wall protective plate (1 pc)

Metric conversions and equivalents

The Metric Conversion Act of 1975, as amended by the Omnibus Trade and Competitiveness Act of 1988, establishes the SI (System International) metric system as the preferred system of measurement in the United States for trade and commerce.

Many products are currently manufactured and supplied in SI or "hard" metric sizes such as anchor bolts of 10 mm, 12 mm, etc. Where the inch-pound system is given or used, "soft" metric conversion can sometimes be used (but specifically not when selecting critical to only use the specified Imperial or Metric diameter bit).

The soft conversion diameters for anchor bolts is given by Table 1. Standard metric conversion factors commonly used for fastening products are given in Tables 2 & 3.

TABLE 1 - SOFT CONVERSION DIAMETERS			
IMPERIAL	HARD	SOFT	
SYSTEM	METRIC	METRIC	
Inch	mm	mm	
1/4	6.35	6	
5/16	7.94	8	
3/8	9.52	10	
1/2	12.70	12	
5/8	15.88	16	
3/4	19.05	20	
1	25.40	25	
1-1/4	31.75	32

Glossary

TERMS/ACRONYMS/SYMBOLS	DESCRIPTION
MISCELLANEOUS	
Augmented Reality (AR)	Augmented Reality is an interactive experience of a real-world environment where the objects that reside in the real world are enhanced by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory and olfactory.
Brake force	Force required to stop a moving lift
Corporate Visual Identity (CVI)	Corporate Identity is a complete company graphic solution which you use to present yourself to your potential clients. Its main feature is a style that is recognizable in each corporate identity graphic design element.
Infection Control	Infection control is the discipline concerned with preventing no socomial or healthcare-associated infection. $ \\$
QR Code	QR codes are two-dimensional barcodes, they often contain data for a locator, identifier, or tracker that points to a website, an application or in this case Augmented Reality models
Rolling force	Force required to push the lift and maintining its movement
Start force	Force required to push the lift and make it move
SWL	Safe Working Load (SWL) is the maximum safe force that a piece of lifting equipment, lifting device or accessory can exert to lift, suspend, or lower, a given mass without fear of breaking.
XXS XS S M L LL XL One size	These symbols represent the available sizes for the corresponding slings
STANDARDS	
AAMI	The AAMI standards program consists of over 100 technical committees and working groups that produce Standards, Recommended Practices, and Technical Information Reports for medical devices. Standards and Recommended Practices represent a national consensus and many have been approved by the American National Standards Institute (ANSI) as American National Standards.
ANSI	The American National Standards Institute (ANSI) is a private non-profit organization that oversees the development of voluntary consensus standards for products, services, processes, systems, and personnel in the United States.[3] The organization also coordinates U.S. standards with international standards so that American products can be used worldwide.
DSDC	DSDC is the world leader on the design of services and environments for people with dementia.
IEC 60601	60601 is a widely accepted benchmark for medical electrical equipment and compliance with IEC60601-1 has become a requirement for the commercialisation of electrical medical equipment in many countries.
IEC 60601-1	Requirements of 60601-1 may be overridden or by passed by specific language in the standards for a particular product.
IP24	Protected against solid objects over 12 mm, e.g. persons fingers and against water sprayed from all directions - limited ingress permitted
IPX4	Protection against water sprayed from all directions - limited ingress permitted
IPX7	Protected against the effect of immersion between 15 cm and 1 m
IPX24	Protection against direct sprays of water up to 15o from the vertical and against impact of 2.0 joule (e.g. 500 g weight falling from 40 cm height)
ISO 10535	ISO 10535 specifies requirements and test methods only for hoists and body-support units intended for the transfer of disabled persons as classified in ISO 9999. The requirements of ISO 10535 are formulated with regard to the needs of both the disabled persons being hoisted and the attendant using the hoist.
Type BF	IEC 60601-1 uses the term applied part to refer to the part of the medical device which come into physical contact with the patient in order for the device to carry out its intended function Type BF is generally for devices that have conductive contact with the patient, or having medium or long term contact with the patient.
UL 2601-1	this Standard is primarily concerned with safety, it contains some requirements regarding reliable operation where this is connected with safety.
