SFID425 Adjustable Bench

The SFID425 Adjustable Bench features thick, durable padding and multiple independent back/seat adjustments. The seat pad can be adjusted to flat, 10, and 18 degrees; while the bench offers seven separate adjustments including flat, 15, 30, 45, 60 and 80 degrees as well as a -18 degree decline. The back and seat pads pivot independently on sealed bearings providing unsurpassed durability and quality. Oversized wheels with a front transport handle offer easy transportation and movement. Use with dumbbells, or combine with a smith machine, squat rack or power rack, the SFID425 Adjustable Bench is the essential bench for any facility.
