

The PHS Medical Shovel Station is ideal for improving strength and increasing range of motion. The three angles and gravity flow shelves allow material to fall to the base. The multiple shelf heights allow a varied range of motion for arms, shoulders, legs and back. This simulates on-the-job duties, easily permitting the therapist to evaluate a patient's performance.

### STANDARD FEATURES:

- Hardwood, plywood construction
- (3) Angled gravity flow shelves
- Folding side keeps sand in place
- (4) Safety treads
- Bumper edges
- Plastic shovel and storage hook included
