

Gait Belt Loop Handles

Purpose

Skil-Care's Gait Belt Loop Handles are designed to provide caregivers with a more secure and comfortable way to grip the gait belt when a patient is being ambulated.

Re-Order #	Description	Size	Unit
913145	Gait Belt Loop Handles	5"L	6/pk
914389	Delux rubber grip - 1" Plastic Webbing	5"L	6/pk

Instructions

- 1. Place two loops handles on each gait belt. The belt should be inserted through the smaller, inside loop. The larger, outside loop is the grip handle.
- 2. Secure gait belt around patient's waist and position one loop at the patient's bake and the other at his/her side.
- 3. Right-handed caregivers should position the side loop at the patient's left side, and left-handed caregivers position the side loop at the patient's right side. The caregiver's strong hand should be used to grip the loop at the patient's back.
