

general purpose slings

Our General Purpose sling is a reusable sling that has a high weight capacity and a generous overall width to offer a stretched seating position that is well-suited for lifting heavier users in all situations. The integrated head support allows the patient to be lifted even from a floor and its unique material can be laundered to allow for use by multiple patients.

Ventilated Polyester Material

The NSB General Purpose Sling is a versatile sling that can be used for many different patients with many different lifting situations. It has a padded head support and is made from a polyester material with built-in flexibility to achieve proper leg and body positioning. This flex material allows the sling to remain behind the patient for short periods of time and the ventilated portion allows breathability.

Bariatric Option

The NSB General Purpose sling is available in adult sizes Small to Extra Large and can carry a maximum capacity of 318kg/700lb as well as a bariatric version that can carry

a maximum capacity of 454kg/1000lb. This product is only available in North America.

Optimal Features

This sling features divided and padded legs and a high back with an integrated padded head support for added comfort. The strong, durable material and design makes it ideal for a seated or semi-recumbent transfer. The sling features 8 straps for optimal positioning on both a ceiling or floor lift. The unique material allows the sling to be laundered for use by multiple patients.

Note: This product is only sold in North America.
