

alonglove

A dynamic orthosis for wrist, hand, and fingers

Open your hand more easily and strengthen your grip with the AlonGlove for stroke recovery. The Glove helps you extend your fingers while supporting your affected wrist and hand.

- Fingerless design opens fully for one-handed application
- Elastic hook-and-loop fasteners for adjustable fit
- Max-Dri polyester lycra wicks moisture for all-day comfort
- Anti-microbial and anti-bacterial glove interior prevents odor
- Removable, flexible finger splints are lightweight and comfortable
- Hook-and-loop fasteners for finger splints allow full and independent customization of tension and placement.
- Soft finger tips have anti-microbial material for clean comfort and "Slip-Not" grip fabric for use in wet and dry conditions
- Lightweight aluminum wrist stay is held in a pocket for easy removal when it is time to adjust the angle or wash the Glove
- Easy care by hand washing and hanging to dry
- Designed by a stroke warrior and made in the U.S.A.

"I wanted to create a glove my one-handed self could put on alone, even when my spastic fingers were clenched into my palm. It is easy for me to adjust the tension, and I have what my thumb and fingers need for the exercise or activity of the moment."
