SAFEGUARDS

The following fitness safeguards and operating precautions are directed to purchasers and users of the Air Bike. Club Managers should ensure that members and fitness staff are trained to follow these same instructions. Failure to follow these safeguards may result in injury or serious health risk.

- Ensure that the seat height adjustment knobs is properly secured and do not interfere with range of motion during exercise.
- Children under the age of 16 should not ride the bike. The bike mechanism and ergonomics are designed for adult use only.
- Do not insert any object, hands or feet into any openings, or expose hands, arms or feet to the drive mechanism or other potentially moving part of the bike.
- The maximum weight for individuals riding the bike should not exceed 350 pounds (159 kilograms).
- Do not dismount the bike until both the pedals and the moving arms have stopped completely. Failure to comply may lead to loss of control and serious injury.
- If at any time you feel dizzy or have difficulty breathing, gradually stop pedaling and carefully dismount the bike.
- Listen to your body, ride at a pace that feels right for you.
- Keep children and pets away from the bike whenever it's in use.
- Never turn the pedal crank arms by hand.
- Stay hydrated. Drink water throughout your ride as needed.
- Stay in control by executing all movements at a slow pace before attempting to increase your speed. Do not attempt to ride the bike in a standing position.
- Do not exercise at high speeds and intensity without having initially established a baseline fitness level and obtaining a medical clearance from your physician. Focus on form, posture and establishing a controllable pace before attempting any high intensity short duration sprints.
- Do not use the bike without proper footwear. Never operate the bike with bare feet.
- Never place your feet in any position on the bike other than the pedals or the stationary foot platforms on the sides of the flywheel cage. Do Not extend your legs out to the side, in the movement path of the pedals and movable arms, while the bike is in motion to void injury.
- User Weight Limit: 350 lb

AB900 PRE-ASSEMBLY

Use the following procedures to unpack and assemble your Air Bike manufactured by Spirit Fitness:

1. Position the shipping carton so the Heavy End is located at the bottom.
2. Cut the straps then lift the box over the unit and unpack. Remove all parts from the shipping carton and foam inserts, and verify that all parts are included in your shipment:
3. Locate the hardware package. The hardware is separated into four steps. Remove the tools first. Remove the hardware for each step as needed to avoid confusion. The numbers in the instructions that are in parenthesis (#) are the item number from the assembly drawing for reference.

NOTE: All tools required to assemble the bike are included within the packaging, except for a Rubber Mallet, which is recommended when assembling the pedals onto the bike.

NOTE: If you are missing any of the parts listed above, inspect the packing material and the box for items that may have been overlooked.

If parts are missing, or if you have any operational questions, please call your local Spirit Fitness's Service department or the distributor whom sold you the product. Please see the back of the manual for a listing of international corporate offices and locate the office nearest you. Have your serial number ready.

CAUTION: Damage to the bike during assembly is not covered as part of the limited Spirit Fitness warranty. Take care not to drop or lean the bike on its side. Carefully stand the bike up in the normal upright position on a stable surface so it will not tip over during assembly.

Protect the environment by not disposing of this product with household waste. Check your local authority or approved waste center for recycling advice and facilities.

TESTING THE BIKE

Use this checklist to perform the bike test procedure.

- ❑ Recheck all the bolts and make sure they are all tightened to the proper torque specification (if indicated) and no parts are missing.
- ❑ Test the seat post to make sure they move freely and you are able to lock in at different positions.
- ❑ Check the seat to make sure it is level and tight and does not rotate around or tilt. Tighten and adjust as needed.
- ❑ Test the seats horizontal adjustment for movement front to rear and check it by settings it at different settings.
- ❑ Adjust seat post to your needs (Refer to page 27). Ride/test the bike for proper operation according to this owner's manual.

CAUTION: The movement arms move whenever the pedals are turning. Do not dismount the bike until the pedals and movement arms come to a complete stop.

- ❑ Pedal the bike at a moderate pace and test for proper and smooth movement of the pedals and arms.
- ❑ When the testing is complete, even the movement arms, and tip the bike forward using the arms and roll it on a smooth surface to the final location and adjust the leveling feet so the bike is stable.

INSTRUCTIONS

Your Air Bike is easy to use. There are no resistance knobs to adjust as the resistance comes from the isokenetic resistance created by the movement of air with the fan-shaped flywheel. Control over the resistance is obtained by simply varying the pace of pedaling and of the push / pull on the movement arms. Typically, exercising at a slower pace generates a lower resistance from the flywheel, enabling a cardiovascular endurance workout that can be sustained for extended periods of time. Higher pace exercise involving faster pedaling and more forceful pushing / pulling on the movement arms creates a greater resistance level that will deliver a greater muscle endurance or anaerobic workout. Anaerobic exercise and High Intensity Interval Training (HIIT) are much more strenuous forms of exercise that should only be undertaken by users that have established a baseline fitness level capable of adapting to this form of exercise. Users are also encouraged to discuss their health program or fitness regimen with their healthcare professional.

Additionally, the bike can be operated with only the use of the movement arms for an upper-body-only workout. The front foot pegs, located on either side of the flywheel are to be used when exercising only with the movement arms. Position feet securely on these platforms while pushing / pulling on the movement arms.

NOTE: that the pedals will continue to rotate when the bike is used with the movement arms only. Be certain to maintain feet on the front foot platforms when exercising with the movement arms only so that feet stay clear of the rotating pedals.

SEAT ADJUSTMENTS

Proper bike setup gives you a more comfortable ride and reduces your risk of injury. To adjust the seat height: Dismount the bike. Loosen and pull out on the seat height pop-pin to release it from its current preset location, while holding the seat with one hand. Raise or lower the seat to the desired height, then gently release the pop-pin. Raise or lower the seat slightly, if necessary, until the pop-pin engages a preset hole.

SEAT HEIGHT

At the proper height, there should be a slight bend in your knee when you're at the bottom of a pedal stroke. (Figure 1)

FIGURE 1

FIGURE 2

FORE/AFT POSITION

Once the proper height has been achieved, adjust the seat forward or back so that when the feet are in the 3 o'clock and 9 o'clock positions, the forward knee is directly over the pedal axle. Recheck the seat height again after making the fore/aft adjustment, as moving the seat forward and backward can have the same effect as moving it higher or lower. (Figure 2)

TRAINING INFORMATION

BEFORE BEGINNING

Be sure the seat is adjusted for your body size and comfort before beginning your workout. Consult your physician before beginning this or any other exercise routine. Discontinue any exercise that causes you discomfort and consult a medical expert.

WARM-UP

Once you are in position and sitting on the bike with your hands in a comfortable position on the movement arms, slowly begin pedaling, while pushing / pulling on the arms. A gradual warm-up prepares the muscles and cardiovascular system for a more intense workout, and helps prevent potential injuries from occurring. Your warm-up should be sufficient once your breathing rate begins to increase and you begin to perspire lightly. The warm-up period should last about five minutes.

WORK OUT

A brisk and rhythmic workout will train the muscles and cardiovascular system to perform at a higher efficiency. The key is to exercise aerobically; typically at 60% – 80% of your maximum heart rate.

COOL-DOWN

Slow and relaxed activity after a workout allows the muscles and cardiovascular system to gradually return to a resting level.

DISMOUNTING BIKE

WARNING: DO NOT DISMOUNT THE BIKE OR REMOVE YOUR FEET FROM THE PEDALS UNTIL BOTH THE PEDALS AND THE MOVEMENT ARMS HAVE STOPPED COMPLETELY. Failure to comply may lead to loss of control and serious personal injury.

AB900 CONSOLE OPERATION

CONSOLE BUTTONS

The **Target Display Panel** will show **Time**, **Distance** and **Calories**. As any of the target symbol is appears means that target mode is operating.

The **TIME** will alternate show the remain or elapsed time. The **DISTANCE** will countdown in miles or kilometers depending upon the initial console setup. The **CALORIES** will countdown the number of calories burned during workout.

WATTS, SPEED & RPM DISPLAY

Watts, **Speed** and **RPM** will be displayed during all modes. The watts will show the amount of work produced in a particular time during workout.

The speed will show the value which is derivative from the RPM or pedal speed. The value will show in miles or kilometers depending upon the initial console setup. RPM (revolutions-per-minute) is the speed of the spinning cranks.

HEART RATE DISPLAY

This panel will show every user's heart rate relating information.

When console detected a signal from the wireless monitor, the BPM (beats-per-minute) will show in the large three-digit field and the heart icon will flash. However, if console is not detected any signal, it will show – in that field.

When the target heart rate mode is operating, the console helps the user maintain in a BPM range to build cardiovascular endurance. The target value range will post next to the 65% of Max HR and 85% of Max HR banners. The ▲ or ▼ symbol will flash to tell that an increased or decreased pedal speed is needed to reach the desired range. When the user's heart rate is in the target range, the Target Heart Rate Achieved banner will light.

CONSOLE SETUP

BATTERY INSTALLATION

The console operates on 4*AA batteries (not included). The battery compartment is on the back side of the console.

SETTING METRIC & IMPERIAL UNITS – SETUP MODE

The default setting is in Imperial Units (mph). In the **Ready Mode** press and hold the **Start** and **Enter** buttons for two (2) seconds until KM or M is flashing, pressing ▲ or ▼ to select metric (KM) or imperial (M) units, and then press **Enter** to confirm.

PROGRAMMING

SLEEP MODE

After 60 seconds of inactivity, the console will switch into the power-saving Sleep Mode. The display will switch off. Rotating the pedals or pressing any button on the console will launch the Ready Mode.

READY MODE

The Ready Mode informs the user that the console is powered on and ready to enter into any mode. After a period of 60 seconds of inactivity the console will switch into the Sleep Mode.

PAUSE MODE

During any mode of operation, pressing the **Start** button will launch the Pause Mode for 5 minutes. The console will beep every 30 seconds and the display will flash, to remind that the console is in Pause Mode. If there is no activity within the 5 minute period of Pause Mode, the console will switch into Ready Mode.

To exit the Pause Mode and continue the current program, press the **Start** button. To quit the paused program at any time, press the **Stop** button to launch the Ready Mode.

WORKOUT SUMMARY

The console provides a brief workout summary after completed the workout. Data displayed includes: Total Time, Total Distance and Total Watts.

RESET PROCESS

To reset all saved settings (except the metric or imperial units setting), press and hold **Stop** button for 2 seconds.

CONSOLE PROGRAMS

QUICK START

The Quick Start Mode automatically begins displaying workout information as soon as pedalling begins. No programs run during Quick Start. The console will show up all data, including Heart Rate (if a heart rate chest strap is detected). Quick Start will end once pedalling is stopped. Pressing the **Stop** button will end the Quick Start Mode and display the workout summary.

INTERVAL 20/10 & 10/20 MODE

The Interval Mode provides a series of 8 workout intervals with preset time segments. This training method is known as Tabata® or High Intensity Interval Training (H.I.I.T.). The Interval Mode will indicate the start of each work/rest period of each interval.

20/10	10/20
Number of Intervals: 8 Work - Interval Length: 20sec Rest - Interval Length: 10sec	Number of Intervals: 8 Work - Interval Length: 10sec Rest - Interval Length: 20sec

Launch: Press the **Interval 10/20** or **20/10** button.

Start: The interval begins with a countdown starting from three, informing the start each work interval

End: The Interval Mode will end immediately after the last segment of the 8th interval. Pressing the **Stop** button at any time will also end the Interval Mode. The workout summary will be shown after the Interval Mode has ended or the **Stop** button has been pressed.

CUSTOM INTERVAL MODE

Interval Custom Mode allows the length of the work/rest segments to be customized as well as the total number of intervals.

Launch: Press the **Interval Custom Mode** button.

Setup: When operating the Interval Custom Mode (after the console has been reset), user will enter the total amount of intervals, and work/rest time interval. Adjust the value by pressing ▲ or ▼ buttons, then pressing the **Enter** button to confirm for each setting.

Start: The interval begins with a countdown starting from three, informing the start each work interval.

End: The Custom Interval Mode will end immediately after the last segment of the final interval. Pressing the **Stop** key at any time will also end the Interval Mode. The workout summary will be shown after the Custom Interval Mode has ended or the **Stop** button has been pressed.

TARGET TIME, DISTANCE, CALORIES MODE

Target Time, Target Distance and Target Calories Mode allows the target goal of each value to be customized.

Launch: Press the desired **Target** button (TIME, DISTANCE, CALORIES).

Setup: When operating a Target Mode (after the console has been reset), user will enter the target value. Adjust the value by pressing ▲ or ▼ buttons, then pressing the **Enter** button to confirm the setting. If no value has been entered, the console will use the last setting as the Target value on each mode.

Start: Each mode display field will light up and begin to showing as following: *For the TARGET TIME MODE the time target will begin to countdown. For the TARGET DISTANCE MODE the distance will begin calculating. For the TARGET CALORIES MODE the calories will begin calculating.*

End: The mode will end when the Target Mode is achieved. Pressing the **Stop** button at any time will also end the Target Mode. The workout summary will be shown after the Target Mode has ended or the **Stop** button has been pressed.

TARGET HEART RATE MODE

The Target Heart Rate Mode allows the maximum beats per minute (BPM) target to be customized to maximize cardiovascular training, according to the user's age. The Heart Rate Mode calculates the maximum heart rate value to optimize the training target between 65% - 85% of users calculated or theoretical maximum heart rate.

Launch: Press the **Target Heart Rate Mode** button.

Setup: When operating a Target Mode (after the console has been reset), the user enters their age. Adjust the value by pressing **▲** or **▼** buttons, then pressing the **Enter** button to confirm.

Start: The display field will light up and begin to display heart rate and progress toward cardiovascular goal. When the users heart rate is lower than 65% of the calculated maximum HR range, the 65% display will flash indicating minimum goal has not yet been achieved. When the users heart rate is over 85% of the calculated of maximum HR range, the 85% display will flash indicating heart rate is over maximum goal.

End: The mode will end when the user stops pedaling. Pressing the **Stop** button at any time will also end the Target Mode. The workout summary will be shown after the Target Mode has ended or the **Stop** button has been pressed.

BLUETOOTH

The Bluetooth function will only connect when the console is in the Stop Mode. When the console is in Stop Mode, press the **Bluetooth** button. The Bluetooth symbol will flash on the display. Connect to the console through the Bluetooth function on your device. After a positive connection, the workout summary will upload to the APP.

ENGINEERING MODE

Press **Start** and **Enter** buttons for 2 seconds to enter Engineering Mode. The console will also beep for 1 second. DISTANCE banner will blink first. Press ▲ or ▼ button to select setting section.
(DISTANCE → Sound → odo → DISTANCE)

While in Engineering Mode if there is no activity for 30 seconds, the console will switch STANDBY Mode. Pressing the **Reset** button twice will exit the Engineering Mode. The console will not erase the setting value or ODO value under RESET mode. However, removing the batteries will make the console return to original factory settings and the ODO value will turn zero.

METRIC/IMPERIAL

- Under Engineering Mode of the DISTANCE setting, the DISTANCE banner will blink. Press **Enter** to get into.
 - After pressing **Enter**, M or KM will blink.
 - If the console is on Imperial system, the M sign will blink.
 - If the console is on Metric system, the KM sign will blink.
- Press ▲ or ▼ button to select Imperial or Metric units. Press **Enter** to confirm and the console will return to Engineering mode.
- While in this setting if there is no activity for 30 seconds, the console will switch STANDBY Mode. Pressing the **Reset** button twice will exit the Engineering Mode.

AUDIO ON/OFF

- Under Engineering Mode of the Audio ON/OFF setting. The SOUND sign will blink. Press **Enter** to get into.
- After pressing **Enter**, the console will display "ON" or "OFF"
 - If the audio is on, the "ON" sign will blink.
 - If the audio is off, the "OFF" sign will blink.
- Press **Enter** to confirm and the console will return to Engineering Mode.
- While in this setting if there is no activity for 30 seconds, the console will switch STANDBY Mode. Pressing the **Reset** button twice will exit the Engineering Mode.

ODO

- Under Engineering Mode of the ODO setting. The ODO sign will blink. Press **Enter** to get into.
- When exercise time over 1:59:59, the LCD will display "H" sign.
- When exercise distance over 99.99, the LCD will display KM or ML and the number will not have the decimals.
- Press **UP or Down** to switch to other Engineering mode.
- While in this setting if there is no activity for 30 seconds, the console will switch STANDBY Mode. Pressing the **Reset** button twice will exit the Engineering Mode.

GENERAL MAINTENANCE

A regular preventative maintenance schedule with all fitness equipment ensures that products are working at an optimal condition without affecting the end user exercise experience. To assist in the maintenance regiment, it is recommended to break service into: Daily, Weekly, & Monthly activities. Details on each activity can be found in the “Maintenance” section of this document.

TOOLS

Working on this product will require basic and/or sometimes specialty tools based on the type of service that will be performed at any time. To assist, Spirit Fitness recommends having the tools listed (Fig. 1) available when performing maintenance.

FIGURE 1

TOOLS	PURPOSE
Crank Puller	Removing cranks and pedals
Metric Allen (Hex Key) Wrench Set	Tightening or removing various Allen head screws throughout the product.
Metric Sockets Set	Tightening or removing various hex nuts used throughout the product.
Metric Open Wrench Set	Tightening or removing various hex nuts used throughout the product.
Square Drive Ratched Wrenches	To use in conjunction with Allen head and or hex socket sets.
Torque Wrench	Tightening various critical bolts throughout the product to specific torque specifications.
Phillips Head Screwdriver Set	Tightening or removing various Phillips head screws used throughout the product.
Flat Head Screwdriver Set	Prying off specific shrouds from wedged locations.

MOVING & LEVELING

To move the bike to a new location: Lift the bike from the rear and use the front wheels (located on the front leg, below the handlebar) to roll the bike from one location to another.

To level the bike: Use the four leveling adjusters (located on the underside of the front and rear legs) to compensate for uneven floor surfaces.

PREVENTIVE MAINTENANCE

Perform regular scheduled preventive maintenance procedures to maintain your Air Bike bike in serviceable condition.

DAILY MAINTENANCE

The life of your product will be determined by how consistently you perform the daily maintenance procedures. Dry the Air Bike after each use to remove sweat and moisture. It is best to use a liquid non-abrasive cleaner diluted with water.

Wipe Down/Cleaning: To prevent the build-up of rust and other forms of corrosion, wipe down the bike at the end of each day (or preferably at the end of each class). Raise all posts to the highest setting to expose moisture. Using an absorbent cloth, focus on all areas that perspiration can settle. Give attention to the following areas:

- Handgrips
- Seat / adjustable slide for the seat
- Back leg assembly
- Guard
- Pop-pins
- Leveling feet

NOTE: Never use abrasive cleaning liquids or petroleum-based solvents when wiping down the bike.

WEEKLY MAINTENANCE

Weekly maintenance should focus on the overall performance of the bike. During these inspections, look for vibration and possible loose assemblies. Have an experienced rider ride each bike to identify and help diagnose any vibration, noises, and any “unusual” feeling from the drive belt. Either faulty flywheel alignment or a loose belt can cause vibration. Check for proper flywheel alignment. Torque flywheel nuts as necessary. Inspect each bike for loose assemblies, parts, bolts and nuts. Give particular attention to the following:

- Tighten all frame base hardware.
- Tighten all pop-pin handles.
- Tighten seat hardware.

MONTHLY MAINTENANCE

The monthly maintenance check should be a comprehensive inspection of the overall frame and main assembly components of the Spinner indoor cycling bike in addition to the weekly maintenance.

SANITIZING YOUR SPIRIT FITNESS EQUIPMENT

- Unupholstered high-contact surfaces (hard plastics) can be sanitized using a 75% isopropyl alcohol solution and a clean, dry cloth. Spray surfaces to be sanitized, and use the dry cloth to wipe clean. Allow surfaces to dry before using.
- For upholstered or soft-plastic surfaces, use a conditioner after sanitizing. Be sure to follow the instructions provided by the conditioner manufacturer to ensure proper use of the conditioner.
- Alternatively, you can make your own spray by mixing the proper ratio of isopropyl alcohol and distilled water to reach a 75% solution.
- For more details on sanitization, or to learn how to make your own spray solution, please visit <https://support.spiritfitness.com/hc/en-us/articles/4406787148564> .

INSPECTION AND ADJUSTMENT

Inspect the frame and main assembly components for rust or corrosion. Tilt the bike or place in an upside down position to locate areas where rust and corrosion may develop. Use a small, wire brush to remove rust build-up in small crevasses, such as leveling feet, pop pin handles and other bolt assemblies. Give particular attention to the following areas:

- Leveling feet
- Pop pin handles

Inspect all wear items for adjustments or possible part replacement. Give particular attention to the following:

- Inspect seat pad for wear. Rips, tears or excessive movement indicates replacement is required.
- Inspect pedals for play. Excessive movement of pedals indicates replacement is required.
- Tighten seat hardware.
- Leveling feet.

FRAME CARE

It is recommended that the frame on the bike is sealed from sweat impurities that may speed the corrosion process at least once a month.

Cleaning: Using a clean terry cloth that is dampened in 30 parts water to 1 part non-abrasive detergent or car wash soap rub over the frame of the product.

Wash/Dry: Dampen a clean terry cloth in an only water solution to wipe away any soap residue. Using a second clean and dry terry cloth; dry off any liquid residue.

Sealing: The frame can be sealed by applying a wax or polishing coat that can help repel away liquids like human perspiration. Apply the wax or polish per the manufacturer's instructions for best results.

PARTS REPLACEMENT

Depending on the use and maintenance of the product, certain items may need to be replaced upon inspection due to wear. These can be identified during scheduled inspections as described in the Preventative Maintenance section of this owner's manual beginning on page 43.

AB900 AIR BIKE WARRANTY EFFECTIVE DECEMBER 10, 2020

Spirit Fitness warrants all its fitness bike parts for a period of time listed below from the date of retail sale, as determined by sale receipt, or in the absence of a sales receipt eighteen (18) months from the original factory shipping date. Spirit Fitness' responsibilities include providing new or remanufactured parts, at Spirit Fitness' option, and technical support to our independent dealers and servicing organizations.
