

Swift commode

Swift commode facilitates the situation for persons who require a toilet near the bed. It is a modular, height-adjustable chair with detachable padding for the seat and backrest. The pan has a lid with a handle, and is easily removed from above. As with other products in the Swift family, the commode is designed with infection control, functionality and simplicity in mind.

Multiple functions

Besides the commode function, the Swift commode may also be used as a shower chair or over the toilet as a freestanding toilet seat raiser.

The Swift commode is stable but at the same time has a built-in flexibility that allows all four legs to stand firmly even if the floor is uneven. The seat of the Swift commode can be set slightly angled to make it easier for the user to rise from the chair. Also, the backrest and armrests may easily be removed if necessary.

Easy to handle

Swift commode is easy to assemble, handle and clean. The light weight makes it easy to move, and it can be brought directly to the shower for easy cleaning. The integrated pan has a tightly securable lid that locks when the handle is in the upright position.

To assemble and adjust the height of the Swift commode is easy as no tools are needed. The product comes flat-packed, together with the pan and cushions.

Description	Item no.
