

## TEQ-FallsAlert

Promoting  
Independent  
and Dignified  
Living

# Real-Time Falls Detection

TEQ-FallsAlert has been designed to protect the dignity and comfort of the user.

Using radar technology rather than cameras, the user can be assured of privacy in their home. If a fall takes place, an instant alert is issued so that help can arrive the second it is needed.

TEQ-FallsAlert is installed into the upper corner of the room and is free from trip hazards. It does not require the user to wear a device, which protects their dignity and comfort.

Easy to install, the TEQ-FallsAlert is simply affixed to the wall, plugged into a power outlet and paired with Wi-Fi. It provides an extra layer of security, providing peace of mind for both users and their families.

- ✓ Get help the second it is needed
- ✓ Falls from standing, seated and bed are detected
- ✓ Defends dignity: no need for the user to wear a device
- ✓ Free from trip hazards
- ✓ Pair with app or online portal
- ✓ Easy Install: plug and play
- ✓ No cameras to protect privacy
