DeRoyal Delivers...

DeRoyal understands that in the unitized market, one size does not fit all. Each customer has different and specific needs, sometimes a simple basin set, at other times a procedure-specific tray. DeRoyal's approach to the unitized market focuses on tailoring a custom solution for every customer.

DeRoyal has been in the unitized products business for 35-years. In that time, we have learned a great deal about what you, our customers, need and want in a unitized product supplier. DeRoyal's goal is to provide a high quality, convenient, and cost-effective unitized solution for our customers via four basic product configurations...

PREP KITS

DeRoyal's Prep Kits provide cost-competitive convenience and unsurpassed quality for aseptic application. DeRoyal has Standard Prep Kits in the most popular configurations that are available for immediate shipment or you can create your own Custom Prep Kit.

BASIN SETS

DeRoyal, like you, has found that a few basic supplies are used for most procedures. So, we offer basic unitized options in our DeRoyal Basin Sets that provide a significant portion of procedure supplies in small bundles. All provide low-cost bundled solutions to reduce the inconvenience and cost of pulling products, so you can stand ready for all procedures. DeRoyal Basin Sets are available in standard or custom configurations.

PROCEDURE PACKS

For additional convenience without adding significant cost, you can choose a standard or custom DeRoyal procedure pack. DeRoyal's Optimal Procedure Packs are standard surgical tray packs that have been developed with the input of experienced nurse practitioners and include procedure specific draping and supplies. In addition, DeRoyal has years of experience in creating and managing custom procedure packs.

PROCEDURE CARTS

The extra convenience of DeRoyal's unitized delivery procedure carts also adds to bottom line cost savings by reducing O.R. set-up time, preventing supply shrinkage and obsolescence, and decreasing inventory investment. DeRoyal offers both standard as well as custom procedure carts. DeRoyal's latex free standard procedure TraceCarts, available in a variety of configurations, strategically streamline the delivery of a variety of essential surgical bundles. DeRoyal can also quickly develop custom carts to your specifications.

Surgical Products Any Way You Want Them

Delivering surgical products exactly the way you want

Prep Kits

DeRoyal offers an array of standard surgical prep kits for a variety of purposes. You can also create your own prep kit.

Basin Sets

DeRoyal knows that real convenience means packing savings along with products. Our Basin Sets are ready for all procedures – from a simple laceration to a C-section procedure – and can be customized for your most frequent needs. This means time savings that are matched with quality and cost consciousness so vital to the success of your ER, OR, Ambulatory Center, Outpatient Surgery, or L&D.

- All Convenience Kits are 100% latex free
- Standard Convenience Kits contain stock items and are ready for shipment when ordered
- As with all DeRoyal's assemblies, all kits are customizable

Procedure Packs

Supply standardization is a logical concept and its value is easily proven with DeRoyal's Standard Procedure Packs. Each of these case-specific product groupings are delivered ready for use – standardized product sets especially useful in the increasing number of ambulatory surgery centers and outpatient surgical units of hospitals – streamlined ways of operating that bear the brunt of today's most frequently preformed procedures.

Developed with the input of experienced nurse practitioners, DeRoyal's Standard Procedure Packs contain only quality latex free products, ensuring safe implementation in every case for both clinicians and patients. Procedure-specific draping is also included for ease of implementation.

And, with DeRoyal's years of experience in unitized delivery production, costs are contained because of our streamlined assembly techniques that are passed on in the form of streamlined set-up times and reduced supply costs for you.

- All Procedure Packs are 100% latex free
- Standard Procedure Packs are stock items which are ready for shipment when ordered
- Procedure specific key sheets are included in each set
- Each set has the same high quality standards as DeRoyal custom trays
- All have been logically developed for ambulatory and outpatient surgery needs
- Each set configuration is nurse-reviewed for clinical accuracy

Delivering surgical products exactly the way you want

Procedure Carts

An open system like TraceCart lets you choose the items you want from the vendors you prefer. You get surgical supplies at the lowest possible price. With DeRoyal's Procedure Cart System, you order only what you need when you need it. We can stock your TraceCart to meet a surgeon's needs. The supplies for each stage of the procedure are packed together in removable bundles so everything is there – when you want it – to accommodate your needs.

OTHER AVAILABLE LATEX FREE KITS:

- I.V. Start Kits
- Anesthesia Kits
- Patient Positioning Kits
- Prep Kits
- Basin Sets
- Surgical Accessory Kits
- Wound Dressing Kits
- Procedural Trays

STANDARD LATEX FREE PROCEDURE CARTS ARE AVAILABLE FOR:

- Vaginal Delivery (53-2050)
- C-Section Delivery (53-2051)
- General Surgery (53-2060)
- Orthopedic (53-2061)
- Laparoscopy (53-2091)

The Value Added Service Program

DeRoyal recognizes that while unitized products are a great convenience they can also be an expense that can seem difficult to control. DeRoyal has developed various tools to identify opportunities for cost savings. The Value Added Service Program is a two-step process that helps you manage costs for your facility.

DeRoyal[®]
PACK Management

PACK MANAGEMENT WEB-BASED TRAY ACCESS

The PACK Management is a web-based tool created to support a hospital's information needs in the ongoing maintenance and enhancement of a custom procedure tray program. This easy-to-use site provides you all the information related to your tray inventory, quoting, and standardization options, giving you the tools for the proactive management of a crucial segment of your hospital's operations. With DeRoyal's PACK Management, all your tray information is at your fingertips, offering real-time inventory, easy-to-modify, user-friendly program tool, and its free on-line to all DeRoyal tray customers.

Delivering surgical products exactly the way you want

Controlling Cost for Your Success

DeRoyal offerings bring you the optimal mix of products for your specialty and your facility.

We work to learn how to best maximize the success of your delivery program. Your specific customer solution aims to give you exactly what you want, and can involve a mixture of our standard and custom product configurations.

PROCEDURE MANAGEMENT INFORMATION SERVICES

Procedure Management Information Services from DeRoyal provide detailed consumption analysis sourced from your hospital's existing O.R. information system. We provide regular analysis of surgeon and procedure cost trends as well as standardization reviews that are key to ongoing supply expenditure reductions. DeRoyal's Procedure Management reports provide a simple yet effective means to identify supply expenditure savings that reach beyond the price of custom procedure trays.
